

Organic Chemicals Division
CAPITAL PROJECT SCHEDULE

Project Name and Number: OC 3007 Lead Dust -
Ventilation and Material Handling Renovation EP 20

Approximate Cost:

\$275,137

Location:

Chicago

Description (INCLUDING APPROXIMATE CAPACITY):

Reduce airborne lead dust by improved material handling and ventilation in Chicago plant.

Objective (INCLUDING ECONOMICS):

Redesign and upgrade facilities to meet OSHA requirements for airborne dust abatement.

Special Considerations:

EPA is setting a standard for lead in the atmosphere. Plans are made to measure lead emitted from the plant vents and stacks after completion to determine if any hygiene problems are posed to the surrounding neighborhood.

Date of Issue: 5/11/79 COMPLETE

Supersedes: 4/10/78
