The Kettering Laboratory
College of Medicine
Eden Avenue
Cincinnati 19, Ohio

Dear Bob:

May I give you my grateful thanks for your letter of March 9 commenting on the possible toxicity of titanium. This will tee us off on a program here, some facets of which, I hope, will be of mutual interest to Kettering and our Company later on. I hope to be in Cincinnati some time a little later during the year and shall contact you in the hope that we might get together for a visit.

Sincerely yours,

Delmas K. Kitchen, M.D.
Medical Director
