

1 wheel grinder to sharpen a tool, a hole or shovel,  
2 something like that and some of the machines were  
3 larger and horizontal in configuration, but they  
4 are -- essentially it is a grindstone that removes the  
5 material in a controlled fashion.

6           You see that the average concentration  
7 there, again, a little distance away, about that far  
8 away, was just under five fibers per cc on average and  
9 that the range was 1.7 to 7.

10           As you got further away, once again, the  
11 further away you get, the lower the concentration  
12 gets.

13           Q     Now, there is an entry there that says  
14 distance 8.3 m or meters, that is about 24 feet; is  
15 that correct?

16           A     Yes, sir, a little more.

17           Q     Even at that distance it is still four times  
18 what the OSHA standard for asbestos was at .2 fibers?

19           A     Yes, sir, out of the 1986 --

20           Q     The 1986 level?

21           A     Yes, sir.
