

OFFICE MEMO

BROWN & ROOT, INC.

TO: Rick Carter, Mid-Valley
FROM: Carl Richardson
SUBJECT: Asbestos and Fiberglass Sampling

DATE: June 23, 1975 *24.*

Enclosed please find the information you requested concerning Asbestos and Fiberglass Sampling.

For personnel sampling, a gravimetric pump is needed. Distributors in the Houston area are: (1) M.S.A. (Model G - approximately \$235.00), (2) Tackaberry (Model Bendix Micronar - approximately \$200.00).

Millipore Corporation supplies an asbestos filtering cassette which includes all accessories needed. Model HAWP 037A0 which costs approximately \$42.00 for a box of fifty. According to the Millipore Corporation, this cassette can also be used for fiberglass sampling. These can be obtained by writing or calling:

Millipore Corporation
Bedford, Massachusetts 01730
(617) 275-9200

A calibration setup will be needed for the personnel sampling pumps. A "homemade" unit can be built for approximately \$30.00, or a commercial unit can be bought for approximately \$70.00 from Curtin-Matheson. The calibration setup is a necessity. A certified laboratory, according to NIOSH Standards, will be needed for counting the cassette samples.

If any further information is needed, please feel free to contact me.

OFFICE MEMO

BROWN & ROOT, INC.

TO: Project Managers &
Safety Supervisors
FROM: Tommy Chadwick
SUBJECT: Recordkeeping for Asbestos

DATE: January 9, 1973

All records required by OSHA to be maintained shall be forwarded to the Houston Safety Office.

1. The original Physical Examination Form shall be sent to the Houston Safety Office. A copy shall be retained at the job site.
2. All records for monitoring of dust samples and the laboratory report shall be sent to the Houston Safety Office. A copy of the reports shall be retained at the job site.
3. Notification in writing of over-exposed employees to asbestos shall be made immediately to the employee. Also employees shall be notified in writing of corrective action taken to eliminate over-exposure. A copy of both notifications shall be sent to the Houston Safety Office.
