Mr. John Blum
Hoechst Celanese
1389 Schoolhouse Road
New Castle, Delaware 19720

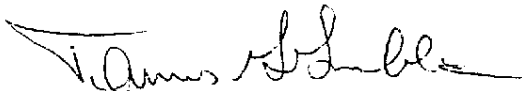

Dear John:

Enclosed are examples of our responses to customer inquiries on Proposition 65. The requests we get vary from a simple yes/no request to the concentration form I've enclosed. We generally try to be as quantitative as possible in our responses.

To further define the status of our PVC products, we are developing leaching data on compounds with the highest levels of additives, i.e. lead, on the Proposition 65 list. The proposed TCLP method will probably be used for this analysis. Hopefully this data will allow us to make some judgement on the release or exposure potential to environmental media.

We are in the process of modifying our MSDS, where applicable, to contain specific Proposition 65 warnings.

Sincerely,

Thomas G. Grumbles, C.I.H.
Environmental Quality Manager

Re: PROPOSITION 65

Dear Mr. Coolidge:

Attached are the chemical concentration forms you requested for Vista PVC products you purchased. Please be aware that the concentrations listed are weight percents of the additive containing the listed material and may not be the actual concentration of the Proposition 65 chemical.

In addition to the additive chemicals, Vista PVC compounds may contain trace quantities of vinyl chloride. The concentration is typically less than 1.0 ppm.

Please call me at 713-531-3445 if you have questions on this information.

Sincerely,

Thomas G. Grumbles, C.I.H.
Environmental Quality Manager

CALIFORNIA PROPOSITION 65
CHEMICAL CONCENTRATION FORM

The following products supplied to Electri-Flex Company, contain the chemicals listed on the attached sheet which appear on the California list of chemicals known to the State to cause cancer, reproductive toxicity or birth defects as of this date. These products are the only products sold to Electri-Flex Company by this firm that contain any of the chemicals on the California list.

<u>ELECTRI-FLEX STOCK NO.</u>	<u>VENDOR STOCK NO.</u>	<u>NAME OF LISTED CHEMICAL</u>	<u>CONCENTRATION OF LISTED CHEMICAL (%)</u>
03019	[REDACTED]	Cadmium	0.76
		Lead Chromate	1.45
03016	[REDACTED]	Cadmium	0.53
03173	[REDACTED]	Lead	2.84
		Lead Chromate	0.71
03282	[REDACTED]	Lead	2.43
03016	[REDACTED]	Lead	2.61
03016	[REDACTED]	Cadmium	1.81
03016	[REDACTED]	Lead	2.95

RE: CALIFORNIA PROPOSITION 65

Dear Mr. Alchimisti:

In regards to your request, our records indicate you purchase PVC compound. Based on our understanding of Proposition 65 the following information is provided.

PVC compound may contain trace amounts of residual vinyl chloride. The amount is variable but typically well below 1.0 ppm. The wire and cable compounds you buy also contain lead compounds. However these lead compounds are bound in the PVC matrix and typically not released to the environment.

Please feel free to call me at 713/531-3445 if you have questions on the above.

Sincerely,

Thomas G. Grumbles, C.I.H.
Environmental Quality Manager
