Subject: Alert - Benzene Health Research Consortium

Importance: High

Consortium Workgroup;

API management is sending out a letter today to the members of the Executive Committee (CEOs of the member companies) that will underscore the need for their action to support the proposed studies in China by July 1 for the project to go forward. This message is being sent to alert you that the letter is coming, and that you may have an opportunity to provide input within your company regarding this decision. If there is anything I can provide to assist you in this effort, please let me know.

Regards,
