Re: Civil dialogue on global warming

Enclosed is a reprint of an interview with physicist William Happer, Ph.D., one of the most prestigious climate scientists in the world.

The interview was conducted in December 2016 by TheBestSchools.org, “an independent organization comprised of a dedicated group of educators, editors, authors, and web professionals who—like you—believe learning transforms lives for the better and should remain a lifelong pursuit.”

William Happer, Ph.D.

This is an absolutely remarkable interview. I hope you’ll make time to read it, and then pass it along to colleagues or friends who might also benefit from reading it. TheBestSchools, Heartland, and Dr. Happer would love to see you cite the interview in your own writing on this important issue.

Dr. Happer notes in response to one question:

Government actions to combat the non-existent problem have blighted the landscape with windmills and solar farms. They have driven up the price of electricity, which has disproportionately harmed the poorest segments of society. Government actions have corrupted science, which has been flooded by money to produce politically correct results. It is time for governments to finally admit the truth about global warming. Warming is not the problem. Government action is the problem. (p. 15)

Dr. Happer is the Cyrus Fogg Brackett Professor of Physics (emeritus) at Princeton University, former director of the Office of Energy Research, former director of research at the U.S. Department of Energy, and co-founder of Magnetic Imaging Technologies. He is also cofounder and chairman of the CO2 Coalition, the website of which is co2coalition.org.

We are eager to get your feedback on this publication and Heartland’s work on global warming generally. Please take a few moments to complete our survey at <https://www.surveymonkey.com/r/HapperTestimony>. You can also call me at 312/377-4000 or contact me by email at vharrison@heartland.org if you have any questions, concerns, or suggestions.

[An interview with physicist William Happer on #ClimateChange](#)¹

William Happer is the Cyrus Fogg Brackett Professor of Physics, Emeritus, in the Department of Physics at Princeton University. A long-time member of JASON, a group of scientists which provides independent advice to the U.S. government on matters relating to science, technology, and national security, Happer served as Director of the U.S. Department of Energy's Office of Science from 1991–1993.

Best known to the general public as a vocal critic of the U.N. IPCC “consensus” on global warming, he has been called frequently to give expert testimony before various U.S. congressional committees on the subject of global warming (climate change). In 2015, he found himself at the center of a new controversy involving a so-called “sting” operation organized by Greenpeace.

A list of some of Professor Happer's major research publications may be accessed [here](#).
