R. S. Lamar

TALC PRODUCERS' ASSOCIATION (PROPOSED)
R. T. Vanderbilt Company

In view of the developments at the recent meeting in New York City attended by you and Dr. Speil, it appears very much in order to go on record not only with the Vanderbilt people, but also others in the industry interested in OSHA, FDA and other matters of concern at this time.

Pursuant to our conversation last week in Denver, it is therefore suggested that you immediately propose a letter, which you indicated you would do, and send it to the writer. It is asked that you indicate to whom you feel this letter should be addressed, in accordance with the foregoing statement. Also, it is my suggestion that perhaps Jack Solon should initiate the letter and follow through. I am giving a copy of your January 18 letter to both Messrs. Solon and Dick Carter.

It is my strong feeling on this matter that Johns-Manville's position must be based on facts. I know on this you agree, and also, in general, others in the industry of necessity for the good of the industry, certainly must take the same position.

P. A. Martinson
