

1           MR. SMITH: Dr. Bishop was the Newark plant  
2 doctor. Mr. Black was an attorney for Owens-Corning.

3           Enclosed is a copy of a letter received  
4 today from Dr. Schepers of Saranac Laboratory. He was  
5 the successor to Dr. Gardner at Saranac.

6           This is certainly not what I had in mind  
7 when I asked Dr. Schepers to give us a letter  
8 incorporating favorable statements based upon past  
9 experiments with fiberglass in the laboratory.

10           I personally do not like the general tenor  
11 of this letter. It certainly is nothing we can show  
12 customers or a union.

13           Attached is a letter from Dr. Schepers which  
14 is our Exhibit 324 against Owens-Corning. It is dated  
15 February 6, 1956. It is to Mr. Burch.

16           Your Honor, we would offer this for  
17 admission against Owens-Corning.

18           THE COURT: The number again is --

19           THE COURT CLERK: 324.

20           THE COURT: 324 will be admitted.

21           (Whereupon, Plaintiffs' Exhibit Number 324
