Re: Notice of Air Pollution Conference in Pennsylvania

The following item appeared in the August 7 issue of Air/Water Pollution Report:

PENNSYLVANIA: Harrisburg -- Gov. Raymond P. Shafer has announced plans for a two-day Conference on Air Pollution at Hershey Community Center, Oct. 2-3. Conference, headed by Dr. Thomas G. Fox, chairman of Governor's Science Advisory Committee, is designed to establish "firm, working guidelines for intensified air pollution control."

This meeting sounds as if it might generate a great deal of interest among those of our members who have operations in the State of Pennsylvania and those who are interested in following the progress of the Pennsylvania ambient air standard for lead of 5 micrograms per cubic meter of air.

Very truly yours,

Don G. Fowler
