

1940

INDEX

Volume I

A

Accident Statistics: Fundamental Causes of Accidents. Panel Discussion, 91-105.
Practical Uses of Accident Cost Data in the Safety Program (Draper), 564-569.
Practical Uses of Accident Cost Data in the Safety Program (Grant), 563-564, 566-569.
Adams, O.: Water Utility, 644-646.
Aeronautical Section: Minutes, 285-300.
Officers, 285.
Aeronautics: Copilot Material and Training (Bryan), 295-296.
Proposals for Safe Regulation of Charter Operator (Whitney), 292-294.
Regulation of the Charter Operator (Lederer), 288-292.
Training Mechanics for Safe Air Transport Operation (Healey), 297-299.
Training Mechanics for Safe Air Transport Service (Smith), 299-300.
Uniform Airport Traffic Control (Berry), 285-287.
"After the Whistle Blows": Contests and Cooperation. Panel Discussion, 186-187.
Cooperation with Public Officials. Panel Discussion, 193-196.
The Value of After-Work Safety Lectures. Panel Discussion, 187-189.
The Value of "Off-Duty" Safety Programs. Panel Discussion, 183-185.
Agricultural Safety Session: 29-46.
A.S.S.E.-Engineering Section: Minutes, 301-304.
Officers, 301-302.
Anderson, K. H.: Interest of Rural Youth Organizations in Farm Safety, 41-42.
Annual Meeting of Members, 11-26.
Aprons: See Clothing.
Armstrong, T. O.: Ask the Employee, 492-495.
Automotive and Machine Shop Section: Minutes, 305-318.
Officers, 305-306.
Automotive and Machine Shop—Power Press Sections: Joint Session, 313-318.

B

Bales, E.: How the Public and Authorities Can Aid in the Railroad Safety Program, 720-722.
Banquet, 27-28.
Barber, M. I.: Nutrition for Industrial Workers, 148-150.
Bates, G. J.: Correcting Unsafe Practices Through Methods Study, 630-633.
Bawden, A. A.: Safety Accomplishments During the Past 25 years by an Old Timer, 522-527.
Beatty, D. H.: The Public Aspects of Grade Crossing Accidents, 707-709.
Bedale, F. E.: A Course of Training Foremen for Safety Work, 499-502.
Belts—Safety: Important Factors in Testing Safety Belts (James), 247-250.
Safety Belt Anchors—Design, Quality, Placement and Maintenance (Manes), 245-247.
Safety Belt Materials (Soutar), 250-252.
Berman, H. H.: Coal Bunker Case, 646-647.
Berry, Maj. J.: Uniform Airport Traffic Control, 285-287.

Bethune, F.: Textile Safety Through the Plant Nurse, 728-730.
Boardman, J. L.: What Should a Mine Safety Inspector Look For? 516-519.
Bonesteel, Brig. Gen. C. H.: Safety and War, 15-17.
Boughner, C. A.: What the Foreman Can and Cannot Do for Safety, 253-257.
Braun, F. W.: Review of 1939-40 Accident Experience, 557-562.
Breweries: Safe Practices in Refrigeration of Breweries (Kiernan), 663-665.
Brown, A. L.: Spontaneous Ignition and Its Control, 82-86.
Bryan, O.: Copilot Material and Training, 295-296.
Building Maintenance Session: 47-62.
Burger, J. J.: Eliminating the Causes of Textile Accidents, 730-732.
Burns: Why Can a Small Electric Burn Cause Death When Large Burns from Flames Do Not? Panel Discussion, 385.

C

Cadman, R. M.: The Problem of Underground Service Station Tanks, 614-620.
Cameron, W. T.: Standardizing State Industrial Safety Requirements, 115-117.
Cement and Quarry Section: Minutes, 319-326.
Officers, 319-320.
Cement Industry: Analysis of Cement and Quarry Industry Accident Experience (LeGore), 320-323.
Creating a Safe Working Force. Panel Discussion, 325-326.
Physical Control of Accident Hazards. Panel Discussion, 323-324.
Chains: Chain Block and Chain Inspection. Panel Discussion, 392-393.
Chemical Industry: The Safe Disposal in Chemical Plants of Empty Containers Including Tanks, Drums, Cans, Bottles, Gas Cylinders, Dismantled Equipment, and Old Pipe Lines (Jones), 341-346.
The Use of Rubber and Rubber Compounds in the Chemical Industry (True), 328-333.
Chemical Section: Contest, 336-338.
Minutes, 327-351.
Officers, 327-328.
Child Safety: How to Enlist the Support of School Children in Accident Prevention (Meyers), 717-718.
Clarke, J. O.: Safety Requirements of the Federal Food, Drug and Cosmetic Act, 377-381.
Clothing: Aprons and Gloves for Employees Using Cutlery. Panel Discussion, 439.
Personal Protective Equipment Suitable for Men Handling Lumber. Panel Discussion, 740-741.
Safety Shoes. Panel Discussion, 437-438, 440.
Safety Shoes for Wood Handlers, 580.
Coal: Coal Bunker Case (Berman), 646-647.
Colleges and Universities: Interest of Agricultural Colleges in Farm Safety (Lehmann), 42-45.
Commercial Fleets: See Drivers and Driving.
Committees: Safety Committees. Panel Discussion, 154-157.

Construction Industry: The Maintenance of First Aid Units for Compressed Air Workers (Requarth), 367-371.
 Organizing a Steel Erection Job for Safety (Hazard), 354-358.
 Safety Features in the Construction of Hiwassee Dam (Walters), 372-374.
 Safety Pays Dividends (Cowper and Locher), 363-367.
 See also Ship-building.
 Construction Section: Minutes, 353-374.
 Officers, 353-354.
 Contests: Chemical Section, 336-338.
 A Competitive Safety Program that is Working (Sturtevant), 726-728.
 Marine Section, 425-426.
 Metals Section, 461-463.
 Methods of Developing a Competitive Safety Program (Monroe), 724-726.
 Paper and Pulp Section, 581-583.
 Petroleum Section, 622-624.
 Plant Safety Contests: Round Table Discussion, 584-588.
 Presentation of the Edward Benton Fritz Memorial Trophy, 582-583.
 Public Utilities Section: 649-650.
 Rubber Section, 679-680.
 Safety Contests, 160-162.
 Contusions: The Control of Sprains and Strains (Wittmer), 121-125.
 Conveyors: Safe Handling of Bulk Materials (Robertson), 554-557.
 Corbitt, W. A.: Lessons from Safety Experience, 647-649.
 Cowper, J. W. and Locher, H. O.: Safety Pays Dividends, 363-367.
 Cranes: Analysis of a Locomotive Crane Accident. Panel Discussion, 92-97.
 Electrical Hazards of Overhead Traveling Cranes (Schlossberg), 199-203.
 Cylinders: The Safe Disposal in Chemical Plants of Empty Containers Including Tanks, Drums, Cans, Bottles, Gas Cylinders, Dismantled Equipment, and Old Pipe Lines (Jones), 344.

D

Dairy Products: See Milk and Dairy Products.
 Dams: See Construction Industry.
 Davidson, Dr. M.: Industry's Obligation to More Adequately Protect the Worker's Eyesight, 63-67.
 Davis, H. G.: Work of the Farm Equipment Institute in Farm Safety, 34-36.
 Derby, W. N.: Safety Education and the Training of Seamen, 418-420.
 Dermatitis: See Health Hazards.
 Detectors: See Gases.
 Discipline: Panel Discussion, 451-455.
 Doors: Swinging and Revolving Doors in Public Buildings, 50, 53, 56-57.
 Draper, J. A.: Practical Uses of Accident Cost Data in the Safety Program, 564-569.
 Drivers and Driving: Analysis of a Truck Driver Accident. Panel Discussion, 101-103.
 Are Women Worse Drivers than Men? 196.
 The I.C.C. Drivers' Log. Panel Discussion, 384-385.
 What is Speeding? Panel Discussion, 395-396.
 Drums: See Tanks and Drums.
 Duggan, J. J.: Accident Prevention Through Periodic Test and Inspection of Machinery and Equipment, 333-336.
 Dusts: Dust Cleaning Equipment. Panel Discussion, 387-389.
 Maximum Allowable Concentrations of Dangerous Dusts and Gases (Hamilton), 110-114.
 Pulmonary Diseases in the Mining Industry (Sayers), 530-548.

E

Eaton, R. S.: Accident Prevention Through First Aid, 733-735.
 Economics of Safety: An Executive Looks at Safety (Nagler), 638-641.
 Safety Pays Dividends (Cowper and Locher), 363-367.
 Education of Workmen: A Course of Training Foremen for Safety Work (Bedale), 499-502.
 Methods and Techniques. Panel Discussion, 261-276.
 The Training Program. Panel Discussion, 265-276.
 Electrical Equipment: Hazards and Proper Maintenance of Portable Electrical Equipment (Shepard), 346-351.
 Electrical Industry: See Public Utilities.
 Electricity: Effect of Electric Current. Panel Discussion, 388-389.
 Elevators: Elevator Problems, 57-61.
 Employees: Ask the Employee (Armstrong), 492-495.
 Enlisting Employees in the Accident Prevention Program. Panel Discussion, 600-619.
 Merit Rating Systems, 267-269.
 Methods of Maintaining the Interest of Management and Employees. Panel Discussion, 151-154.
 Employees—Training: See Education of Workmen.
 Employees' Publications: How Large Should a Plant be Before it Has a House Organ? Panel Discussion, 385-386.
 Engineering: Correcting Unsafe Practices Through Methods Study (Bates), 630-633.
 Safety in Original Design (North), 676-679.
 Engineers: Confessions of a Consulting Safety Engineer (Goldstine), 360-363.
 See also Supervisors.
 Erickson, T. A.: Minnesota 4-H Clubs Safety Program, 39-41.
 Executives: See Management.
 Exhibits: Safety Exposition Exhibitors, 743-747.
 Eye Protection Session: 63-77.
 Eyes: Defective eyesight as a Contributing Cause of Accidents, 76-77.
 Eye Examination Program, 66-67.
 In What Operations and Occupations do Eye Injuries Occur Most Frequently? 68-69.
 New Concepts of Visual Performance in Industry (Kuhn), 129-131.
 Visual Acuity and Job Placement, 75-77.
 See also Goggles.

F

Falls—Persons: Percentage of Women having Accidents, Compared to Men, 53.
 Slippery Floors, Rugs and Mats as Accident Causes in Public Buildings, 50-54.
 Farm Safety: Farm Accidents—Why They Occur and Who is Responsible for Corrective Action (Mohler), 29-33.
 Governmental Interest in Farm Safety (McCrorry), 37.
 Interest of Agricultural Colleges in Farm Safety (Lehmann), 42-45.
 Interest of American National Red Cross in Farm Safety (Thrush), 37-39.
 Interest of Rural Youth Organizations in Farm Safety (Anderson), 41-42.
 Minnesota 4-H Clubs Safety Program (Erickson), 39-41.
 Work of the Farm Equipment Institute in Farm Safety (Davis), 34-36.
 Work of the Illinois Agricultural Association in Farm Safety (Seagraves), 33-34.
 Fatigue: Fatigue and Its Relation to Occupational Disease. Panel Discussion, 169-172.

Federal Departments: The Coast Guard Reserve—A Safety Organization (Waesche), 409-411.
 Safety Activities of the U. S. Army Engineers—Problems and Proposed Solutions (Vandervanter), 400-402.
 Fire Control and Prevention Session: 79-90.
 Fire Protection: Dust Cleaning Equipment. Panel Discussion, 387-388.
 Experience with the Water Spray for Fighting Oil Fires. Panel Discussion, 383-384, 386.
 Industrial Fire Drills, 390-392.
 Precautions to be Taken by Users of Hand Fire Extinguishers (Lange), 86-90.
 Spontaneous Ignition and Its Control (Brown), 82-86.
 What Fires of Last Year Have Taught Us (Fleming), 79-82.
 When and Where and if So, What Fire Regulations are Needed for Producing Fields? (Prussing), 598-600.
 First Aid: Accident Prevention Through First Aid (Eaton), 733-735.
 First Aid Training as an Aid in Promoting Accident Prevention (Fisher), 119-121.
 Fisher, Dr. H. E.: First Aid Training as an Aid in Promoting Accident Prevention, 119-121.
 Fleming, T. A.: What Fires of Last Year Have Taught Us, 79-82.
 Floors: Slippery Floors, Rugs and Mats as Accident Causes in Public Buildings, 50-54.
 What Types of Floor Surfaces Tend to Reduce Slipping. Panel Discussion, 440-441.
 Food: Nutrition for Industrial Workers (Barber), 148-150.
 Food Industry: Eliminating Accident Hazards in Soybean Processing (Schwareman), 381-382.
 Experience with the Water Spray for Fighting Oil Fires. Panel Discussion, 383-384, 386.
 Safety Requirements of the Federal Food Drugs and Cosmetic Act (Clarke), 377-381.
 Food Section: Minutes, 375-396.
 Officers, 375-377.
 Foremen: A Course of Training Foremen for Safety Work (Bedale), 499-502.
 How Convert the Foreman? 274-276.
 What the Foreman Can and Cannot Do For Safety (Boughner), 253-257.
 See also Supervisors.
 Foundries: See Metal Industries.
 Fuel: See Coal.
 Fundamental Causes of Accidents Session: 91-105.

G

Gaetjens, A. K.: Light—Antidote for Accidents, 125-128.
 Garbutt, W. C.: Physical Examinations—Standard Requirements—Expense, 405-407.
 Gases: Advantages That Have Been Gained Due to the Invention and Use of Methane Detectors (Zorn), 527-530.
 Maximum Allowable Concentrations of Dangerous Dusts and Gases (Hamilton), 110-114.
 Gloves: Safety in the Manufacture of Leather Gloves (Granniss), 432-435.
 See also Clothing.
 Goggles: Does a Deposit Charge for Goggles Tend to Keep the Men from Using Them? Panel Discussion, 457-458.
 Mining Experience, 73-74.
 The Pro and Con of the Compulsory Goggle Rule, 69-72.
 See also Eyes.
 Goldstine, E. N.: Confessions of a Consulting Safety Engineer, 360-363.
 Governmental Safety Service in Industry Session: 107-117.
 Grade Crossings: The Effectiveness of Grade Crossing Protective Devices from the Viewpoint of State Authorities (Henry), 698-702.

Effectiveness of Grade Crossing Protective Devices from the Viewpoint of the Railroad Engineering Department (Post), 702-707.
 Enforcement as a Factor in Grade Crossing Safety (Kreml), 710-711.
 The Public Aspects of Grade Crossing Accidents (Beatty), 707-709.
 Granniss, E. R.: Safety in the Manufacture of Leather Gloves, 432-435.
 Grant, E. E.: Practical Uses of Accident Cost Data in the Safety Program, 563-564, 566-569.
 Griffin, G. O.: Hazards of River Transportation, 407-408.
 Guards: Safety in Original Design (North), 676-679.
 Specify the Safeguards (Thiede), 307-309.
 Gurley, F. G.: The Public's Responsibility in the Railroad Safety Problem, 712-715.
 Gymnasiums: Floors in Gymnasiums, 53-54.

H

Hamilton, Dr. A.: Maximum Concentrations of Dangerous Industrial Dusts and Gases, 110-114.
 Handling Materials: Safe Handling of Bulk Materials (Robertson), 554-557.
 Safe Handling of Unit Materials (Long), 552-554, 556-557.
 Hazard, W. A.: Organizing a Steel Erection Job for Safety, 354-355.
 Head Protection: What Protective Equipment Should be Worn to Prevent Head Injuries. Panel Discussion, 435-436.
 Healey, T. J.: Training Mechanics for Safe Air Transport Operation, 297-299.
 Health Hazards: Cleaning Gasoline Storage Tanks Used for Leaded Gasoline (Lewis), 593-598.
 Dermatitis in the Rubber Industry (Obetz), 688-692.
 Discussion of Dermatitis (Shirley), 692-696.
 Fatigue and Its Relation to Occupational Disease. Panel Discussion, 169-172.
 Health Hazards in Spray Painting. Panel Discussion, 165-169.
 The Heart and Heart Disease in Industry (Miller), 144-147.
 Lead in Industrial Processes. Panel Discussion, 174-177, 181.
 The Maintenance of First Aid Units for Compressed Air Workers (Requarth), 367-371.
 Maximum Allowable Concentrations of Dangerous Industrial Dusts and Gases (Hamilton), 110-114.
 Protection for Welders, 180-181.
 Pulmonary Diseases in the Mining Industry (Sayers), 530-548.
 Should Occupational Diseases be Considered as Industrial Injuries? Panel Discussion, 178-180.
 Skin Affections. Panel Discussion, 177-178, 181.
 The Toxic Limits of Common Solvents. Panel Discussion, 172-174, 176-177, 181-182.
 Traumatic Neurosis (Pollock), 135-139.
 Health Service in Industry Session: 119-128.
 Henrie, H. C.: The Necessity of Active Participation of Management in Safety Work, 508-511.
 Henry, W.: The Effectiveness of Grade Crossing Protective Devices from the Viewpoint of State Authorities, 698-702.
 Hickok, S. C.: Safety Successes in the Textile Industry Are Recognized, 736-738.
 Home Safety: Home Safety Inspections. Panel Discussion, 192-193.
 Horrocks, A. C.: Getting Safety off the Defensive, 672-676.
 Hospitals: What are the Common Causes of Accidents in Public Buildings and How Can They be Corrected? Panel Discussion, 49-62.

Hotels: What are the Common Causes of Accidents in Public Buildings and How Can They be Corrected? Panel Discussion, 49-62.

See also Public Buildings.

House Organs: See Employees' Publications.

Housekeeping: Plant Housekeeping. Round Table Discussion, 588-589.

Safety Stunts That Have Helped Maintain Good Housekeeping. Panel Discussion, 443.

Stumble Costs Two Fingers. Panel Discussion, 480-483.

Hulbert, Dr. H. S.: Psychology and Safety. Lectures, 209-243.

Human Element: See Personal Factors.

Hurlbutt, F. L.: Ups and Downs; Some Facts About Ladders, 358-360.

I

Ice: See Refrigeration.

Ice Cream: See Milk and Dairy Products.

Industrial Nursing Session: 129-150.

Industrial Relations: Ask the Employee (Armstrong), 492-495.

Employee Welfare Systems, 163-164.

Inspection: Accident Prevention Through Periodic Test and Inspection of Machinery and Equipment (Duggan), 333-336.

Chain Block and Chain Inspection. Panel Discussion, 392-393.

How Safety Inspections Prevent Accidents (Storey), 416-417.

Parking and Inspection of Employees' Cars. Panel Discussion, 189-192.

Preventing Power Press Accidents Through Periodic Machine Inspections (McDonald), 309-311.

What a Mine Safety Inspector Should Look for in Bituminous Coal Mines (Lindley), 520-522.

What Should a Mine Safety Inspector Look for? (Boardman), 516-519.

What Should an Anthracite Mine Safety Inspector Look for? (Peterson), 511-516.

Insurance: Accident Prevention Through the Eyes of an Insurance Executive (MacDonald), 620-622.

Investigation of Accidents: 254-256.

Accident in Plate Mill. Panel Discussion, 471-477.

Accident on Coal Bridge. Panel Discussion, 488-491.

A Coupling Accident. Panel Discussion, 483-488.

Fundamental Causes of Accidents. Panel Discussion, 91-105.

The Safety Supervisor's Part in the Investigation of Accidents (Zeilinger), 257-259.

Slitting Machine Accident. Panel Discussion, 477-480.

Stumble Costs Two Fingers. Panel Discussion, 480-483.
