

- Aniline and Aniline Derivatives**
 aniline: bleeding and blood transfusions in percutaneous poisoning with, 534
 determination of: rapid, 434
Anthraco-silicosis: See under Pneumoconiosis
Anthrax
 occupational: question of danger in handling imported sheep and goat skins, 529
Anticholinesterase: See Cholinesterase
Apparatus: See also Instruments
 Bruck-Vigliani method for aspiration of drilling dust in mines, experiments, 336
 densitometer P. R. U.: for measuring dust content of air, 333
Appointments
 S. E. Miller, 442
 J. H. Sterner, 224
 C. R. Walmer, 224
Arc Welding: See Welders and Welding
Arsenic and Arsenic Compounds
 arsine intoxication: during cleaning out of boiler, 337
 arsine poisoning: two cases, 536
 industrial cancer from: case in Hungary, 110
Arsine: See under Arsenic and Arsenic Compounds
Arthritis: See Rheumatism
Asbestos
 granulomas of skin due to, 326
Asbestosis: See under Pneumoconiosis
Asphyxia: See Carbon Monoxide
Association of Industrial Medical Officers
 quarterly publication, 541
Atmosphere: See Air
Atomic Energy: See also Radioactivity
 beryllium poisoning: chronic, case from atomic energy development [Hasterlik], *547
 fume hood exhaust: controlling, in laboratories, 219
 public health: aspects of, 438
 radiation hazards: control, 439
Automotive Industry
 lead poisoning in workers, 109
Awards
 Dr. Legge, 647
Bacteria: See also Micro-organisms
 dried air-borne: lethal effects of triethylene glycol vapor on, 408
BAL
 in heavy metal poisoning, 424
 lead poisoning and: action on coproporphyrin and lead in urine, 108
 lead poisoning and: effect on blood changes, 109
 polyneuritis: subacute, adverse effect of, with observations on porphyrin metabolism, 428
Baritosis: See under Pneumoconiosis
Barium
 sulfide: thlopneumoconiosis and baritosis due to: various forms studied in Italy, 526
Bartter, F. C.
 Metabolic study of case of chronic beryllium poisoning treated with ACTH, *579
BCG Vaccine: See Tuberculosis
Behavior
 human, effects of noise on communication and [Davis], *227
Bellevue Hospital, Cardiac Clinic Staff
 Effects of employment on course of heart disease, *367
Bendix, R.
 Viewpoint of sociologist (in solving industrial health hazards), *177
Benzene
 benzol poisoning: do alterations in fundus of eyes accompany blood changes in? 533
 blood cells and size of erythrocytes: action on, 109
Benzene—Continued
 intoxication: in Argentine workers, 330
 metabolism of: and homologues in the human organism, contribution to knowledge, 411
 poisoning: blood phenols and urinary conjugated sulfates in experimental, treated with vitamin C, 108
 poisoning: French petroleum and its possible use in prophylaxis of, 329
 printing trades: toxic effects in, 425
 saturation curve: in blood, 101
 solvents: white blood cell counts of sprayers using quick-drying paints: study of health of workers in modern factory using, 429
Benzol: See under Benzene
Berg, B. N.
 Pilot program for cancer detection in industry, *279
Berylliosis: See Beryllium
Beryllium
 berylliosis, 526
 berylliosis: brief discussion and presentation of case with pulmonary, digital and axillary node involvement, 208
 berylliosis: chronic, in neon sign industry [Sander], *565
 compound dust: fluoride elements in pathogenesis of lung disorders produced by, importance, 417
 compounds and: health hazards, review of literature, 414
 disease: from ceramic industry: report of case [Reynolds], *575
 granulomas of skin: experiment with animals [Dutra], *81
 growth and beryllium-induced osteogenic sarcomas, 426
 noxiousness: comparative, in course of preparation and utilization, 534
 oxide (glucine): histological studies of effects on animal tissues, 328
 oxide: toxicity by inhalation and physical properties of, correlation between, 424
 pneumopathies: chronic retarded, 418
 poisoning: acute, biochemical changes in, 414
 poisoning: chronic, case from atomic energy development [Hasterlik], *547
 poisoning: chronic, choice of drugs and dosage [Van Orstrand], *583
 poisoning: chronic, five cases from fluorescent lamp industry: treatment with ACTH and cortisone [Kline & others], *549
 poisoning: chronic, general discussion on treatment with ACTH and cortisone, 629
 poisoning: chronic, information gained in pretherapy and posttherapy pulmonary function studies [McClement], *599
 poisoning: chronic, interpretation of results of ACTH and cortisone therapy: data obtained by pretherapy and posttherapy studies of pulmonary function [Wright], *617
 poisoning: chronic, of long duration from fluorescent lamp manufacturing: report of case [Fenn], *571
 poisoning: chronic, metabolic study of case treated with ACTH [Hardy & others], *579
 poisoning: chronic, spontaneous remission of, from fluorescent lamp manufacturing: report of case [Cass], *569
 poisoning: chronic, symposium on treatment with ACTH and cortisone: chronic pulmonary interstitial granulomatosis: preliminary report on two patients treated with ACTH [De Nardi], *543
 poisoning: by newer metals, 535
 retention: in animal tissues, following inhalation of its salts, 422
 sarcomas: in rabbits, 533
 workers: chronic granulomatosis associated with, pathological physiology of, 414
 workers: current research problems concerning pulmonary granulomatosis in [Klemperer], *625
 workers: dyspnea, observations on causes in chronic pulmonary granulomatosis in, 522
