Mr. Albert E. Fay
Vice President, Research & Marketing
National Gypsum Company
325 Delaware
Buffalo, New York 14202

Dear Mr. Fay:

Mr. Bast has referred the correspondence on asbestos containing products to me. We are aware of the regulations involving fireproofing plaster but are not up to date on any proposed restrictions on joint treatment products or textures. Has there any information dispensed at the recent seminar that you could pass along to us? We also wonder if this subject could be followed through the Gypsum Association since many of the members are involved.

Thank you for bringing this to our attention. It is a subject of concern and we will try to participate in any future deliberations.

Very truly yours,

C. W. Lehnert, Manager
Research and Development
