

A. P. GREEN INDUSTRIAL INSULATIONS

loose wool insulation . . .

A mineral wool for use as a high temperature loose fill insulation up to 1200° F. Its long, stringy fibers make it an extremely efficient insulator. It will not settle down or lose its insulating value over a long period of time. Moisture resistant — chemically inert. Shipped in bags containing 3½ cubic feet of LOOSE WOOL (approximately 30 pounds).

insulation adhesive . . .

An air-setting adhesive for cementing block insulation to a back-up surface. Its excellent workability and water retention properties make it more suitable for bonding porous block insulation than ordinary firebrick mortars. It is also used as a surface coating on block insulation to prevent penetration of water when pouring castable against the block. Heat resistant to 1100° F. Shipped in one gallon and six gallon airtight metal containers.

insulation coating . . .

A weatherproof protective coating for insulation. It provides a hard, waterproof wearable surface over other insulating materials. Recommended particularly for outside installations where moisture, rain, or snow are encountered. Protects insulation against punctures and vibration... preserves insulating efficiency. Heat resistant to 450° F. Shipped in 50, 300 and 500 pound drums. About two pounds of INSULATION COATING will cover one square foot, ¼" thick.

A. P. Green provides the convenience and economy of a single source of supply for refractory and insulation products. There's an A. P. Green insulation product for practically every industrial need, in addition to a complete line of refractory products.

The A. P. Green industrial insulation line is made up essentially of cement, block and castable insulations to take care of general industrial requirements.

BLOCK INSULATION

A 1900° F. Mineral Wool Block

INSULATING CEMENT

An 1800° F. Plastic Insulation

CASTABLE BLOCK MIX

A 1600° F. Castable Insulation

CASTABLE INSULATION No. 20

A 2000° F. Castable Insulation

LOOSE WOOL INSULATION

A 1200° F. Loose Fill Insulation

INSULATION COATING

For Weather-proofing Insulations

INSULATION ADHESIVE

For Cementing Block to a Back-up Surface
