Applicant,

PETITION TO JOIN ADDITIONAL
EMPLOYERS AND INSURANCE CARRIERS

TO THE INDUSTRIAL ACCIDENT COMMISSION OF THE STATE OF
CALIFORNIA, PANEL ONE:

Defendants Western Asbestos Company and State
Compensation Insurance Fund petition this Commission for an
order directing that additional defendants be joined in this
matter because:

1. Applicant, Allen Everitt, alleges that in the
period beginning 1946 and continuing through 1963 he developed
an occupational disease arising out of and in the course of
his employment;

2. Applicant was in the employ of defendant Western
Asbestos Company for parts of the following quarters:

6/30/46	9/30/50	6/30/54	3/31/60

and for no other time;

The copy of this petition
submitted to the Commission

3. Defendants Western Asbestos Company and State Compensation Insurance Fund allege that all or part of applicant's alleged occupational disease, if shown to have been the result of industrial causation, arose out of and in the course of employment for employers other than defendant Western Asbestos Company, and was wholly or partially contracted in the period beginning 1946 and continuing through 1963;

4. Defendants Western Asbestos and State Compensation Insurance Fund allege that applicant was employed by the following employers insured by the carriers indicated as follows:

Dear Mr. Schwab:

Subject: Allen Everitt
Travelers Claim E-586498

In reply to your letter of June 9th, concerning Industrial Accident Commission Claim 63 OAK 11139, I submit the following information obtained in part from our records, and in part from memory of the four jobs on which Allen Everitt worked.

According to the payroll information obtained from our Lancaster home office, Allen Everitt worked for a total of 14 days in November and December of 1958 on Contract 271-213, on which Armstrong was providing insulation on ships being built at Bethlehem's San Francisco shipyard.

1/8/64
WBT
Inasmuch as he worked only 14 days over a period of four weeks on a job in which we began work in December of 1957 and completed in June of 1960, we can assume that he was assigned to standard pipe covering duties, and would have been called on to install "Magnesia" or "Calcium Silicate" or "High Temp" pipe covering, all of which contained small amounts of asbestos. He would unquestionably not have been assigned to the fabrication shop or the pad shop where the materials used, or where a very high amount of cutting of the pipe covering, would indicate that more asbestos fiber would be in the air. ✓

In December of 1959 Allen Everitt returned to employment with Armstrong and worked for 8 days on Contract 271-711, in which Armstrong was providing and installing Polyurethane sheet insulation for DuPont at their Antioch, California plant. There would be no asbestos products used at all on the insulation used on this job, and therefore no possibility for contact with asbestos.

In the last part of December, 1959 and the first part of January, 1960 Allen Everitt worked part weeks on Contract 271-565 on which Armstrong was providing insulation for piping, ducts and vessels on the Bank of America main building in downtown San Francisco, and providing identical insulations on piping, ducts and vessels for the Department of Finance job, Contract 271-563 in San Francisco.

Mr. Ivan A. Schwab

-2-

July 6, 1964.

On both jobs, the insulation was almost exclusively Fiberglas pipe covering and duct wrap, with some amounts of "Fibrocel" pipe covering, a product made from expanded silica, and to the best of my knowledge not containing any asbestos.

Being a short term type of employee, we are confident that Mr. Everitt would have been assigned to the application of Fiberglas duct insulation, which constituted a major part of both of these jobs, it being our practice to apply most of the pipe covering with our permanent type of employee and calling on additional manpower to do the easier type of work, which would include the wrapping of ducts with Fiberglas blankets.

Fiberglas blankets or pipe covering would contain no asbestos at all being entirely glass fiber and phenolic resin binders.

It would therefore appear that during the 38 days that Mr. Everitt was employed by Armstrong, that he would have worked only 14 days on a job in which he could have any exposure to asbestos fibers, those being on the ship contracts.

I hope that this information will be sufficient for your requirements, we will certainly offer any additional help that you feel we may be able to give.

Very truly yours,

Dear Wally:

Subject: Allen Everitt, Asbestosis Claim

*6/5/64
Wally*

We are returning copy of correspondence dated May 4, 1964, from the Travelers Insurance Company with reference to asbestosis claim of Allen Everitt. We have checked the chemical composition of materials noted as used on contracts and find that other than the magnesia pipe covering, no magnesia is included in these products.

Contract numbers as shown belong to the San Francisco operation and although our Mr. Stokely could not be classified as an expert witness on composition of materials, his office will have information on these specific contracts.

Sincerely yours,

re: Allen Everitt vs
Armstrong Contracting & Supply Corp.
Travelers claim No. B-586498

Gentlemen:

We are the attorneys for Travelers Insurance Company in this matter, and have your letter of April 22, 1964, giving earnings for Allen Everitt.

We note that the materials handled by the applicant were as follows:

Contract No.

271213
271711
271565
271563

Materials Used

Magnesia
No - Polyurethane
No - Armaglas
No - Armaglas & Styrofoam

We assume that "magnesia" refers to magnesia pipe covering, and we know from experience gained from trying other asbestosis claims that magnesia pipe covering does contain asbestos, and that it has to be cut and the use does create some dust. We would like to know what the chemical composition of the other products are, with specific information as to whether any asbestos is included, and whether use by a construction worker of those materials creates any dust. If we do have to try this case on the merits, it would also be helpful if you could tell us the job covered by each contract number listed, and could advise us whether there is anybody in your South San Francisco whom we could use as an expert witness as to the composition of the materials used.

Your company insured our manufacturing plant at South Gate during Allen Everitt's alleged employment with Armstrong Cork Company during the third and fourth quarters of 1951. Although practically all of our payroll records prior to 1957 have been destroyed, we were able to confirm from one remaining record that Mr. Everitt was not employed at our South Gate Plant during 1951. We believe this information should enable you to obtain an Order of Dismissal from the Industrial Accident Commission insofar as your representation of Armstrong Cork Company is concerned.

If a more formal statement of Mr. Everitt's employment is required, please let us know.

We have no record of any other earnings for the period in which Mr. Everitt is interested.

Workers began to acquire social security credits beginning 1937; therefore, we have no record of any earnings for 1936.

Our records do not show the amount of earnings in each quarter of 1937 because employers were required to file reports only twice that year.

Any earnings earned after March 31, 1963, have not been included. Earnings are not usually posted to our records for at least 6 months after the period in which the report is filed by the employer. This much time is needed to receive and post the wage reports.

Sincerely yours,

Robert M. Mayne
