October 15, 1986

Mr. John Friend, Plant Manager
Vista Polymers
P.O. Box 91
Aberdeen, Mississippi 39730

Dear Mr. Friend:

We have completed our review of your reports on the vinyl chloride releases on June 27, 1986, and August 8, 1986. Based on your reports, these releases were not in compliance with our regulations and National Emission Standards for Hazardous Air Pollutants (NESHAP). Specifically, the apparent violations are an emergency relief valve discharge from the fresh vinyl chloride (VCV) receiver in Reactor Module No. 2 and a release of vinyl chloride from 743 Reactor.

I suggest that we meet to discuss the apparent violations. Please contact us as soon as possible to schedule a meeting.

If you have any questions, please contact us.

Very truly yours,

Dwight K. Wylie, P.E.
Chief, Air Division
