Dear Carol,

Here are the clips from New Zealand. I will send you copies as I receive them.

I was also wondering if you folks know much about the National dioxin strategy.

I've enclosed a clipping from the Tacoma News Tribune regarding findings in Tacoma.

So far they are refusing to tell us where the sites are where they took the samples.

The samples were taken under Tier 7--ambient monitoring for 2378 TCDD. You will note that high levels were found out at Reichhold

Chemicals--former makers of pentachlorophenol.

This is the first time that Reichhold penta has been associated with 2378TCDD. Please let me know what you think of this article.

Jim

A handwritten signature in black ink, appearing to be "Jim", written over the printed name "Jim". The signature is stylized and cursive.
