

PROCEDURE BULLETIN—TEXAS CITY PLANT P-0105

PLANT EMERGENCY PROCEDURE - OFF HOURS

I. PURPOSE

It is the purpose of this bulletin to outline the routine procedures necessary for the handling of plant emergencies on off-hours.

II. SCOPE

This bulletin covers the responsibilities and procedures for handling plant emergencies such as fires, spills, utility failures, and major injuries, but does not include those procedures covered in P-0308.01, "Texas City Industrial Mutual Aid System", the Emergency Procedure Manual, or P-0132, "Fire and Spill Alarm."

III. RESPONSIBILITIES

A. The Sergeant of the Guards is Responsible for:

1. Notification of the fire crew and needed supervisory personnel.
2. Manning the gates during the emergency.
3. Notification of hospital or injury cases.

B. The Night Supervisor is Responsible for:

1. The supervision of the emergency until the Fire Chief and supervisor of the affected area arrive at the scene.
2. Arranging for transportation of the injured to the hospital.
3. Notification of the injured person's supervisor and Loss Prevention and Safety on all hospital cases.

C. The Loss Prevention & Safety Superintendent is Responsible for:

1. The supervision of the fire crew and medical staff.
2. The notification of management and public relations personnel.
3. The notification of the supervisor and family of a seriously injured employee.
4. Updating the "Callout List" semiannually.

D. The Superintendent of the affected and adjacent areas is responsible for assessing the needs of his unit and the plant when called. If additional supervision is required, this Superintendent is responsible for calling them.

PROCEDURE BULLETIN—TEXAS CITY PLANT P-0105

PLANT EMERGENCY PROCEDURE - OFF HOURS

- E. The Manufacturing Superintendents are responsible for maintaining an up-to-date "Callout List" (see Appendix A for current list) to assure that the people he wants are called and in what order they are to be called.

IV. PROCEDURE

A. Fire and Spill

Upon notification from the field, the Night Supervisor will report to the scene of the emergency and assume overall direction of activity until relieved by the responsible supervisor. The Sergeant of the Guards will sound the fire and spill alarm if necessary, notify the fire crew by radio, and call supervision, using the list of Appendix A until one Supervisor of the affected area and of each of the adjacent areas are contacted. The Sergeant will then call the other supervisors of the affected area. If additional supervision is required, the Supervisor will authorize such calls. The Sergeant will see that the proper gates are opened and manned. No vehicles except those of the fire crew personnel and other appropriate emergency vehicles will be permitted to enter or operate in the plant. Fire crew members will proceed to the plant at a reasonable speed governed by the road conditions, traffic and city speed limits; will slow down as they pass through the gates; and park their cars on the side of the street inside the gate entrance. They will proceed to the emergency scene and operate under the supervision of the Fire Chief or a Captain.

The Loss Prevention & Safety Superintendent will report to the main gate house and assume control of the Fire Radio Net. Upon communication with the Fire Chief, who will keep the LP&S Superintendent informed as to the emergency situation, the LP&S Superintendent will alert or inform medical, public relations, or additional management personnel as to the situation.

The Fire Chief, or his designated alternate, will consult with the LP&S Superintendent and determine when the all-clear shall be blown. A Guard will blow the all-clear from the Main Gate.

B. Serious Injury Cases

Upon notification from the field, the Night Supervisor will report to the emergency scene or meet the injured at the dispensary (depending on the case). The Sergeant of the Guard, upon authorization from the Night Supervisor, will call Danforth Hospital to alert them of a Monsanto emergency

LAM005372

PROCEDURE BULLETIN — TEXAS CITY PLANT P-0105

PLANT EMERGENCY PROCEDURE - OFF HOURS

case. The Night Supervisor will arrange for transportation of the injured to the hospital. An LP&S Supervisor and the injured's supervisor shall be notified on all cases involving serious injury that are sent to the hospital for treatment. LP&S will make sure that the injured's family is notified and will notify Public Relations and management personnel if necessary.

C. Power Failures

Upon notification from the field, the Night Supervisor will report to the emergency scene and assume overall direction of activity until relieved by responsible supervision. The Sergeant of the Guard will notify those people on the power failure list at the main gate. He will contact other supervision as directed by the Night Supervisor. Those notified will come to the plant.

D. Fire Water Line Failure

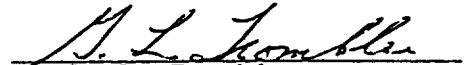

See Appendix C of Bulletin P-0124, "Fire Protection and Equipment".
