RIGHT IN STEP...

for MAKING THINGS LAST

A painter's boy is following in his father's and grandfather's footsteps and the why? "There never was anything better than White Lead then and there's nothing better now." Was yourself know this?

And when you say "White Lead," what are you mean Dutch Boy. It's been doing a good job as long as you can remember—standing up year after year... keeping property paint.

Today that's a mighty good reason for using Dutch Boy. Right now every home you paint is on parade. A real good protection is a white lead paint as well as one with lead—good reason for paint in a house.

When you consider that you can use Dutch Boy on any surface—that it costs little per gallon when mixed and that it's better than ever in a house, body and building—there's every reason for using the real thing in every job you paint.

Now you can also get Pure White Lead as a rich, heavy PAINT—ready to spread.

Yes, make the same Dutch Boy you've always used also comes

as a full bodied pure white lead PAINT.

There's a special "Extra Primer" as well as "Outside White." If you think you're even more concerned with weathering and when you use the white lead and when you use the primer you'll get better than before. Plus weather-lighting protection—extra in one coat! And you'll get the extra quality of white lead at the cost of regular quality paint.

One more point. There's no shortage of a big lead—no change in the quality that made Dutch Boy famous. Whether you use the paint in the house you're painting property outside—you're giving your customers permanent protection.

Leave "What's in a name" when you buy.

Dutch Boy Pure White Lead	Dutch Boy Extra Primer
Dutch Boy Lead Mixing Oil	Dutch Boy Colors as Oil
Dutch Boy Flaming Oil	Dutch Boy Liquid Drive
Dutch Boy Red Lead	

Dutch Boy Paints, Enamels, Primers, and Colors are made in New York, New Jersey, and Pennsylvania. They are sold in all parts of the United States and in all foreign countries.

Right in Step with Uncle Sam

"DUTCH WORK" is nothing new to the famous little Dutch Boy. He rose to fame in long and faithful service in defense of American homes. And today, the white head and red head paint he stands for are helping Uncle Sam by giving sturdy, weather-lighting protection to military installations and equipment, industrial properties and civilian housing.

But this represents only one way in which National Lead Company—maker of Dutch Boy products—is aiding the war effort. Other important contributions include:

Completion of the Mojave Development... a vast mining project deep in the heart of the Mojave Desert... producing ilmenite, a previously imported ore essential in the manufacture of titanium-base pigments. From that mine also comes iron ore, now being supplied to the steel industry at the rate of 500,000 tons per year.

Design and construction of a plant for the production of magnesium and its

alloys from dolomite... a decision on behalf of the National Lead Corporation.

Production of aluminum... the central substance and used in the manufacture of explosives. National Lead Company is today one of the country's largest producers.

In comparison of its ability "A" to do much for defense and blocking about metal aviation parts... and used for more than 25 years in America's war plane engines.

Manufacture of industrial lead and lead alloys... the cross section is average but with a power the Navy's world-famous submarines and provide vital electrical current on land, so the war is on the sea.

Production of aluminum-resistant pipe, valves and steel fittings for America's engineering and power.

Production of bearings and bearing metals for mechanical machinery and machine, transportation and equipment.

Right in Step with Uncle Sam

DEFENSE WORK is making new to the famous little Dutch Boy. He is now part to long and faithful service in defense of American homes. And today, the white lead and red lead paint he stands for are helping Uncle Sam by giving sturdy, weather-lighting protection to military installations and equipment, industrial properties and civilian housing.

But this represents only one way in which National Lead Company—maker of Dutch Boy products—is aiding the war effort. Other important contributions include:

Completion of the Maritime Development... a vast mining project deep in the heart of the Adirondacks... producing alumina, a previously imported ore essential in the manufacture of titanium-base pigments. From this mine also copper ore ore, now being supplied to the steel industry at the rate of 100,000 tons per year.

Design and construction of a plant for the production of magnesium and its alloys from dolomite... a project undertaken on behalf of the Defense Plant Corporation.

Production of alumina... a highly concentrated sulphuric acid used in the manufacture of explosives. National Lead Company is today one of the country's largest producers.

Development of Buckite "X"... a die metal for forming and blanking sheet metal airplane parts... and now in more than 100 percent of America's airplane makers.

Manufacture of antimonial lead and lead oxides... the active elements in storage batteries which power the Navy's diesel-engineing submarines and provide vital electrical current on land, on the sea or in the air.

Fabrication of corrosion-resistant pipe, valves and tank fittings for America's oil-refining and petrochemical plants.

Production of bearings and bearing metals for industrial machinery and modern, mechanized war equipment.

I've met your specifications to a "T"-(TT-0-371)

Read these 5 simple answers to 5 important questions

WHAT? This is a product to be expected to be of leaded and unleaded oil. It is sold in a 5-gallon container and is used in all engines with a leaded oil and is designed to produce results by meeting the same general purpose as the leaded oil. It is made with the same oil and lead, but without the lead.

WHY? Because it is the only one that is made to be used in all engines with a leaded oil and is designed to produce results by meeting the same general purpose as the leaded oil. It is made with the same oil and lead, but without the lead.

WHERE? For meeting or exceeding performance, this is the only oil that can be used in all engines with a leaded oil and is designed to produce results by meeting the same general purpose as the leaded oil. It is made with the same oil and lead, but without the lead.

HOW? This is the only oil that can be used in all engines with a leaded oil and is designed to produce results by meeting the same general purpose as the leaded oil. It is made with the same oil and lead, but without the lead.

When lead and leaded oil pour into the tank of a car, they form a thin layer of leaded oil.

WHY? This is the only oil that can be used in all engines with a leaded oil and is designed to produce results by meeting the same general purpose as the leaded oil. It is made with the same oil and lead, but without the lead.

HOW? This is the only oil that can be used in all engines with a leaded oil and is designed to produce results by meeting the same general purpose as the leaded oil. It is made with the same oil and lead, but without the lead.

How to Retain Film Flexibility and other Quality Characteristics in Reformulating to Higher P. V.

The film industry has been faced with the problem of how to retain the quality characteristics of film when reformulating to higher P. V. (Polyvinyl Chloride) content. This is a problem that has been solved by the use of the following methods:

The first method is to use a high quality film base. This is a film base that has been specially formulated to retain the quality characteristics of film when reformulating to higher P. V. content. The second method is to use a high quality film base that has been specially formulated to retain the quality characteristics of film when reformulating to higher P. V. content.

How to Keep Up House Paint Standards in Reformulating to Conserve Oil

Even today the paint and other decorative materials that we add to our homes can be improved by the use of oil conservation. These materials when used in the home, in many cases, are not used to their full potential and can be improved by the use of oil conservation.

PRESERVING FILM FLEXIBILITY

The growth of additional vehicles in a home paint is likely to be a slow process in structure, shape, and form. However, a vehicle when used to help in the process of a paint film, it is able to improve its ability to preserve the paint film and to help in the process of a paint film.

OFFSETTING LOSS IN BINDING POWER

Another result of the process of a paint film is a loss of binding power. This is due to the fact that the paint film is not able to bind the paint film to the surface of the paint film. This is due to the fact that the paint film is not able to bind the paint film to the surface of the paint film.

COUNTERACTING "PULL"

Another result of the process of a paint film is a loss of counteracting "pull". This is due to the fact that the paint film is not able to counteract the "pull" of the paint film. This is due to the fact that the paint film is not able to counteract the "pull" of the paint film.

NO HIGHER PAINT COST

Another result of the process of a paint film is a loss of no higher paint cost. This is due to the fact that the paint film is not able to increase the cost of the paint film. This is due to the fact that the paint film is not able to increase the cost of the paint film.

NATIONAL LEAD COMPANY

ES 06-2-8 - Approved Person & Agency List - 9-1-2016

NOTICE: If the film image is less clear than this notice, it is due to the quality of the document being filmed

THE war has brought this response:
Business to all of us in the paint business.
For one thing it has given us a
clearer picture.

That picture is this: *There's Last*

In a way it is an opportunity for us to
show by making America's windows, doors,
furniture, farms and factories last
even longer, in a big way, that good
paint is a good investment. It is for
lasting our future business.

Dutchy has so far seen that
Dutch Boy White Lead has into this
program like paint has a can.

The famous Dutch Boy in the New
world is the same as the
most war job of property protection.
And the odds are all with him when
you remember that he has the whole

world's fighting record of what has
lasted him.

The hand of history has written that
what has no only last long it is but
what is for last long has

And then you see it. A white lead
no change in Dutch Boy's last paint
quality.

Whether you will do it with the
lead of the new Dutch Boy paint
will be doing a good turn for your
Last. Now your paint customers and
yourself.

Remember Dutch Boy Pure Lead
has no change in its surface as
has our job must call for paint and
no stopped up, otherwise last and
lasting power.

Remember the new Dutch Boy Pure
White Lead Paint when a touch to our
product is needed. The special Dutch
Boy and Dutch White, and no
matter how aching, boring and when
you are surprised by an other two and
combination plus white lead's power
ability to last, it is last.

"Dutch Boy" is the sign
of a Quality Line

"Here's my Answer to the New Linseed Oil Restrictions..."

I like them now. "No more straight linseed oil, either top or bottom for general use." Hereafter it must contain a proportion of volatile thinner to conserve oil needed for war and food purposes.

To meet the new regulation and also to make a high quality exterior paint oil to use with white lead, we have put Dutch Boy Unseed Replacement Oil on the market. This new product is an expert blend of heat-baked and raw linseed oil, mineral spirits, and driers—making etc. It is designed to produce paints which possess the same general properties—hardness, durability, spreading rate, drying, etc.—as those formerly made with straight linseed oil.

Added to paste white lead, Dutch Boy Unseed

Replacement Oil gives a white lead and linseed oil paint film—the type of coating long known for its workability and durability.

In mixing or thinning paints, Dutch Boy Unseed Replacement Oil may be used anywhere that raw or baked linseed oils have been customarily used.

Make certain in buying linseed replacement oil that it meets Federal Specification TT-4351, as Dutch Boy Unseed Replacement Oil does. Then you will get an oil that you know contains an ample amount of linseed oil, as well as the right proportion of heat-baked oil to give proper viscosity and paint-making qualities.

Sold in the same size packages as linseed oil—1 gallon, 5 gallons, and steel drums.

Right in Step to **MAKE THINGS LAST!**

On a lightning flash in the match
And it's up to us in the paint business
to follow in his footsteps.

Our part of the job here on the home
front is to make things last - the very
place of the home - the home.

That's one way to be a good American
and a good business man too. For on
these homes, farms and factories de-
pend our future peace and life.

That's why when you need paint
you will reach for the weather type
outside paint you can depend on for the
job.

So a good man - a good painter - and

your customer to that this is the last
kind of fight. And that the Dutch Boy
has got both sides rolled up.

In our hands you'll find the long famous
Dutch Boy Paint. Last. Recommended
for its old-time Dutch durability, its
adaptability to any surface, its long
permeable pattern of paint and its re-
sistant whiteness, body and hiding.

In the color band there's the new Dutch
Boy Paint. White Lead Free. Recom-
mended for use on any surface where
a fresh finish is needed. The special
for new homes and the Dutch White
and has that give a fine hiding and
whiteness that sets a standard for
out construction - particularly when

you add an extra half shilling to make
things last.

Another important point. There's no
change in the Dutch Boy's well known quality.
Whether you use the paint in the past
or in the future the Dutch Boy has made
things last.

Both Sleeves Rolled Up to
MAKE THINGS LAST!

As an in the paint business you know
all the tricks of the trade.

Are you sure that your paint is
the best? Are you sure that your paint
is the best? Are you sure that your paint
is the best?

In short, are you sure that your paint
is the best? Are you sure that your paint
is the best?

Dutch Boy paint is the best. It is the
best. It is the best. It is the best. It is
the best. It is the best. It is the best.
It is the best. It is the best. It is the best.

© 1934 by the Dutch Boy Paint Co. Inc.

And when you think the best of
things, you'll find that the best of
things is the best.

When you think the best of things,
you'll find that the best of things is
the best. When you think the best of
things, you'll find that the best of
things is the best.

In the other hand, when you think
the best of things, you'll find that
the best of things is the best. When
you think the best of things, you'll
find that the best of things is the best.

The Patriotic Architect...

1. You have it written in the program, all the
modern buildings from among the purest. And
there is where they can be required, as it is up to
the architect to help us that there is greater
from the modern. And to have more before the
little but really a person.

2. Parthenon was the temple that stood on the
acropolis at Athens. It was dedicated to the goddess
Athena and was the most famous of the temples
of ancient Greece. It was built in the 5th century
B.C. and was the work of the architect Ictinus.
It was destroyed by the Persians in 480 B.C.
and was rebuilt by the Romans in the 1st century
A.D. It was again destroyed by the Arabs in
the 7th century A.D. and has since been
reconstructed by the British Museum.

[illegible]

"There you are, after sports I think there are
 more better as a result to use. I think it's possible
 where he still tends to give a more than usual
 as a special interest. I think the extra and
 not a special interest and as a result
 I have the feeling that and several of painting
 I and as a result, construction and
 not be to them the question, in the
 more and different, more and more
 (He, I hope, this and I don't see pic
 over me." "First, I don't know the Malm.
 There's a few - about 100. He, he
 last that you are in."

Paint's **FIRST** Job is to
MAKE THINGS LAST!

And now you can get weather fighting White Lead
as a Fast-Drying, Ready-to-Use Paste

You've got your shovels pulled up on protecting American property. And here's a new product that can help.

It's just good friend Dutch Boy White Lead, ready to use as a rich, full bodied paste. It's the same white lead that helped you build your reputation, and it's now ready to help you preserve the houses, farms and factories on which your future business depends.

This new Dutch Boy Paste is all "lead" just like the paste And like the paste in the only long lasting paint that makes things last too. And remember there's no shortage of white lead... no change in Dutch Boy's famous quality.

When you want a ready mixed product, get the extra protection of a hot lead or zinc coat with the new Dutch Boy. There's no special "Zinc Paste" as such as "Outside White" and together they give you lasting, lasting and when-

ever no other two-coat combination can beat - sparkling, long-lasting results even on unpainted wood!

The famous Paste also fights rust!

And don't forget Dutch Boy Soft Paste White Lead - when it comes to making things last. It has special advantages all its own. Adaptable to any job - wood, plaster, brick or concrete. Low cost per gallon when mixed. And better than ever whatever, looking and body. No wonder painters call it the "good stuff" - nobody ever found anything to top it.

No matter how hard of Dutch Boy you use - the famous paste is the new paste - you're giving property "permanent" protection. You're making sure that "Paint Protects America!"

Also look for the name "Dutch Boy" on:

Dutch Boy Paste Lead and Zinc	Dutch Boy Wall Primer
Dutch Boy Lead and Zinc	Dutch Boy Colors in Oil
Dutch Boy Plating Oil	Dutch Boy Liquid Dye
Dutch Boy Red Lead

FIRST in line when it comes to **MAKING THINGS LAST**

Nobody has to tell you Dutch Boy White Lead is the good stuff for jobs that last. The stuff that brings you back for more. Truly there's a most important reason for using Dutch Boy. It not only lasts long, it's best. It makes for paint that lasts long. And that's wanted in making a job.

You painters who were through the Lot will know this. And today it's true that ever last one. As a regular user you can experience how much more and Dutch Boy's adaptability to any job in the house, garage, barn, shed, and its improved whiteness, body and hiding.

When you paint with Dutch Boy White Lead you're not only building your own reputation for future jobs but you're doing your country a very real service too.

**It's new! It's Pure White Lead!
It's Ready to Spread! It's Dutch Boy!**

Now you can get the same good Dutch Boy Pure White Lead on rich, full-bodied paint form. It's Pure White Lead all ready to spread!

NATIONAL LEAD COMPANY

©National Lead Company, Inc., New York, N.Y. 1948

Comes in special "Economy Primer," as well as in Dutch Boy's "Eco" primer that gives you a long, lasting and uniform surface that you can paint over with a sparkling long-lasting job on new or old wood! And you get white lead extra quality at the price of regular quality paint. Available from quarts up.

Remember there's no shortage of what had its good quality is unchanged and its best known name is Dutch Boy. Whether you use the old reliable paint form or the new ready-mixed paint, you're giving America's property "permanent" protection. You're proving once again that Dutch Boy's Paints last.

The name "Dutch Boy" also means quality on:

The Kind of "Weather-Fight" that **MAKES THINGS LAST**

Now — get Dutch Boy Pure White Lead —
It's a full-bodied PAINT, ready to spread!

Nothing new about battling the Elements to the Dutch Boy and you truly know they're Uncle Sam's enemies, too. But every house, farm and plant has a job to do — and it'll take good paint to see them through.

And here it is... a new ready-to-use paint, good enough to carry the name "Dutch Boy Pure White Lead."

It's the same quality "lead" that generations of painters have used — only this new form comes all ready to spread! And like Dutch Boy Paste Lead it not only lasts long well but makes property last longer.

There's a special Interior Primer, as well as "Dutch White" for staining, lining and whitening you want. And you try this pure. You'll get a new crop of value that'll show you how good a permanent combination can really be.

You get the extra durability of white lead at the cost of regular quality paint.

...Or Fight Property Waste With Dutch Boy Paste

There's no advantage in the sale of the family car! For our thing goes on along Dutch Boy Pure White Lead in any surface. And no how can you afford to get it in any job. Furthermore, it's more durable than a car and better in color, and body too.

It has better than a car and better in color, and body too. It has better than a car and better in color, and body too.

So make every job a permanent job — help the Dutch Boy prove that Pure White Lead is the best.

The Dutch Boy name marks a line of home

"Here's my Answer to the New Linseed Oil Restrictions..."

Uncle Sam says, "No more straight linseed oil, either raw or boiled, for general use." Hereafter it must contain a proportion of volatile thinner to conserve oil needed for war and food purposes.

To meet the new regulation and to insure a high quality exterior paint oil to use with white lead, we have put Dutch Boy Linseed Replacement Oil on the market.

This new product is an expert blend of heat-treated and raw linseed oil, mineral spirits and driers—nothing else. It is designed to produce paints which possess the same general properties: body, brushability, spreading rate, drying, etc., as those formerly made with straight linseed oil.

Added to paste white lead, Dutch Boy Linseed Replacement Oil gives a white lead and linseed oil paint film—the type of coating long known for its unbeatable durability.

In mixing or thinning paints, Dutch Boy Linseed Replacement Oil may be used any place where it has been the practice to use raw or boiled linseed oil.

Make certain in buying linseed replacement oil that it meets Federal Specification TT-4371, as Dutch Boy Linseed Replacement Oil does. Then you will get an oil that you know contains an ample amount of linseed oil, as well as the right proportions of heat-treated oil to give proper viscosity and paint-making qualities.

I've met your specifications to a "T"—(TT-O-371)

Read these 5 simple answers to 5 important questions

WHAT? This new product is an expert blend of heat-bodied and raw linseed oil, mineral spirits, and drier—nothing else. It is offered as a high quality exterior paint oil to use with white lead—and is designed to produce paints possessing the same general properties as those formerly made with straight linseed oil—body, brushability, spreading rate, drying, etc.

WHY? Because Uncle Sam says "no more straight linseed oil can be heated for general use." To conserve oil needed for war and food purposes, linseed oil must now contain a certain proportion of volatile thinner.

WHERE? For mixing or thinning paints, Dutch Boy Linseed Replacement Oil may be used anywhere that raw or heated linseed oil have been customarily used.

Added to paste white lead, Dutch Boy Linseed Replacement Oil gives a long-wearing white lead and linseed oil paint film—the type of coating long famous for its weather-fighting qualities.

WHEN? Whenever linseed oil is needed, make certain the oil you get contains the maximum linseed oil permitted by present restrictions. Dutch Boy Linseed Replacement Oil meets Federal Specification TT-O-371, which is your assurance that it contains not only an ample amount of linseed oil but also the right proportion of heat-bodied oil to give proper viscosity and paint-making qualities.

HOW? Sold in the same size packages as linseed oil—1 gallon and 5 gallon and steel drums.

No oil can be all the solutions and produce price requirements. "Seven-Ten" doesn't claim so. But one thing is sure: Now, that Tong, Osmura, Perdis and other oils are on the market, it is not too late to try this new, fast-drying oil which is being so favorably received all around.

Seven-Ten Oil is not only available, but it comes in V, Z1 and 10-M varieties, with the following typical characteristics and properties:

	Viscosity	Viscosity	Viscosity
	25	25	25
Viscosity to Power	0	45	600
Seven-Ten 1511	0.5	0.5	0.5
Viscosity per gal. (lb.)	0.5	0.5	0.5
Viscosity per lb. (oz.)	12.5	12.5	12.5
And Number	12	14	16
Boiling Point	161	170	180
Boiling Point	160	170	180
Color (G)	15	15	15
Test Time at 150° F	90 min	14 min	20 min

The above gel times give a good idea of the fast-drying nature of Seven-Ten Oil. The time is one feature of this oil is shown further by the following direct comparison:

NATIONAL LEAD COMPANY

was made with lowest oil of 22 viscosity in processing bottles of cast gum general purpose varnishes.

Res. Oil	Processing Time	Viscosity
TRIOIL V	91 min	U
TRIOIL Z1	62 min	W
TRIOIL 10-M	24 min	X
Lowest Oil Z2	11 min	V

In each case, cast gum was heated with 100 gallons of the base oil at 150° F and held for a few minutes, stirred with 20 gallons base oil, and allowed to settle over night.

"Seven-Ten" is all linseed oil—it contains no other rapid-drying oils or special resin. Fast-drying, quick-setting, hard through drying, requiring no unusual or expensive or special equipment in handling, it is proving very attractive to manufacturers of varnishes, films and enamels.

Don't let Rust steel a march on Metal
— make it LAST!

In this age of lighter, stouter, better and bigger steel, the time has come when the battle has been won.
Even with the most modern rolling of steel, it is not possible to produce a metal that is completely rust-proof.
That explains why today, wherever America's endless industrial empire works, there is a constant fight to the finish with the rust that eats away at steel.
But there is a way to ensure the greatest longevity of metal. The answer is to use the best of steel. The answer is to use the best of steel. The answer is to use the best of steel.

There are two types of steel that are known as the best of steel. The first is the best of steel. The second is the best of steel. The first is the best of steel. The second is the best of steel. The first is the best of steel. The second is the best of steel.

There are two types of steel that are known as the best of steel. The first is the best of steel. The second is the best of steel. The first is the best of steel. The second is the best of steel. The first is the best of steel. The second is the best of steel.

The United Nations is a very young organization, and it is still in the process of developing.

By the same token, if we are to understand the
nature of the world, we must understand the nature of
the mind. The mind is the source of all knowledge,
and it is the mind that creates the world. The mind
is the source of all knowledge, and it is the mind
that creates the world.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

The following information was obtained from the records of the Bureau of Prisons, Washington, D.C., dated January 10, 1968.

[illegible]

2. The first step is to identify the problem or issue that needs to be addressed.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

1. The first step is to identify the problem.

Now to Keep Acids Working for Victory No. 9

WHEN EQUIPMENT IS

STRESSED

AMERICAN process industries are the backbone of the world's production of acid material. And having equipment that stands up to the acid is a must. Tellurium Lead is helping to keep it there.

One way in which Tellurium Lead has been used is in the manufacture of monomers and polymers.

For example, in the kind of Tellurium Lead has been used to coat up tanks that store various acid materials.

The longer life results, among other things, from Tellurium Lead's ability to resist corrosion. The metal alloy actually strengthens the metal on which it is applied, and makes it more flexible to strain than before.

The points at which stress occurs in acid equipment are obvious. When a Tellurium Lead lining is turned over the top of a tank, or when a Tellurium Lead pipe line is bent or flanged, the metal tends to become stronger rather than weaker at the point where it is worked.

In the same way, repetitive stresses such as stretching, bending or pressure have a tendency to weaken Tellurium Lead, give it added strength after several months.

Another frequent requirement of acid handling equipment is resistance to fatigue. The resistance fatigue stresses acting on combinations with Tellurium Lead are more numerous than with other factors alone.

To make these points, Tellurium Lead is used. For the acid tanks mentioned, the whole tank is lined with a coating of Tellurium Lead. In other cases, it is used in the form of a lining or a patch.

In fact, the other methods of using Tellurium Lead are numerous. For example, it is used in the manufacture of acid-resistant equipment. It is also used in the manufacture of acid-resistant equipment. The surface of Tellurium Lead is not only resistant to corrosion, but it is also resistant to fatigue and to stress.

Tellurium Lead is not made by a single method. It is made by a number of different methods, and it is available in a variety of forms.

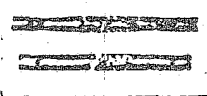

USERS REPORT:

We use Tellurium Lead extensively in the manufacture of acid-resistant equipment. It is a very strong, reliable material, and it is available in a variety of forms.

We have found that Tellurium Lead is a very strong, reliable material, and it is available in a variety of forms. It is also resistant to fatigue and to stress.

available in sheet or pipe form as well as in rods for heating and cooling purposes.

For further information, allow the nearest company to you to send you a copy of this brochure.

The use of Tellurium Lead in the manufacture of acid-resistant equipment is a very strong, reliable material, and it is available in a variety of forms. It is also resistant to fatigue and to stress.

The use of Tellurium Lead in the manufacture of acid-resistant equipment is a very strong, reliable material, and it is available in a variety of forms. It is also resistant to fatigue and to stress.

Journal of Commerce Jan. 1944

Right in Step with Uncle Sam.

DEFENSE WORK is nothing new to the famous Uncle Sam. He has been doing his long and faithful service in defense of American homes. And today, the white lead and red lead paint he stands for are helping Uncle Sam by giving sturdy, weather-tighting protection to military installations and equipment, industrial properties and civilian housing.

But this represents only one way in which National Lead Company - maker of DuPont-Buy products - is aiding the war effort. Other important contributions include:

Completion of the McIntyre Deep-sea... a vast mining project deep in the heart of the Atlantic... producing titanium, a previously unobtainable element, essential in the manufacture of titanium-base pigments. From this mine also comes iron ore for the steel industry.

Design and construction of a plant for the production of magnesium and

its alloys from dolomite... a project undertaken on behalf of the Defense Plant Corporation.

Production of alumin... a highly concentrated sulphuric acid used in the manufacture of explosives. National Lead Company is today one of the country's largest producers.

Development of Kibuto "A"... a die metal for forming and blanking sheet metal airplane parts... and used by more than 90 per cent of America's airplane makers.

Manufacture of antimonial lead and lead anties... the active elements in storage batteries which power the Navy's world-ranging submarines and provide vital electrical current on land, on the sea or in the air.

Refinement of vermiculite-resistant pipe, valves and tank linings for America's oil-refining war plants.

Production of bearings and bearing metals for industrial machinery and motors, mechanical war equipment.

FIGHTING THE NEVER-ENDING WAR —To make metal LAST!

During tomorrow's war, every man who goes to the shop, factory, garage, bank, and school will need a new set of tools. And tomorrow's tools will be made of metal. That's why the metal industry is so important. It's the backbone of our nation's defense.

A recent study of metal tools which has been made by the U.S. Bureau of Mines shows that the metal industry is the backbone of our nation's defense. It's the backbone of our nation's defense. It's the backbone of our nation's defense.

It's the backbone of our nation's defense. It's the backbone of our nation's defense. It's the backbone of our nation's defense. It's the backbone of our nation's defense.

Government and are being kept in a safe place.

The following is a list of the names of the persons who have been identified as having been involved in the activities described above:

*But some of the things we see in the world are not good, and we should not be afraid to speak out against them.

There is a great deal of work to be done in the way of

1. The first part of the document is a list of names and addresses, which appears to be a directory or a list of contacts. The names are written in a cursive script, and the addresses are listed below them.

1. "The first thing I saw when I stepped out of the plane was a vast, flat, open landscape. The ground was a mix of brown and tan, with some small, dark patches of vegetation. The sky was a pale, hazy blue, and the overall atmosphere was one of quiet solitude. I felt a sense of freedom and adventure, knowing that I was about to embark on a journey that would take me to the heart of a remote, unexplored region. The silence was palpable, and I could hear the soft rustle of my boots on the dry earth. It was a moment of pure, unadorned existence, far from the distractions of modern life. The landscape stretched out before me, a testament to the raw beauty and power of nature. I was in good luck, for this was indeed a place of great beauty and interest. The first thing I saw when I stepped out of the plane was a vast, flat, open landscape. The ground was a mix of brown and tan, with some small, dark patches of vegetation. TIO OIL

The New "Activated" Linseed Oil

Many manufacturers have found that TIO Linseed Oil overcomes the problem of replacing and maintaining drying oils.

First of all, TIO Linseed Oil not only dries fast in the bottle but it hardens through drying, helps produce a hard-drying tough hard film.

Secondly, it is made in three varieties: V, F, and 10 M, offering the range of properties and characteristics shown in the table at right based on types of finishes.

Third, it is easy to handle because it is a mild liquid oil, contains no solvent, has no special requirements or techniques in its use.

For test samples and orders of information, address request to the following:

Any way we dress it...

...it's still Pure White Lead!

The Dutch Boy's metal kegs are going to war. Lifting paint steel into the weapons of Victory, our pure, fine, famous Pure White Lead is being packed in sturdy, like war-time kegs.

One thing you can count on—there's nothing changed but the package. They still get the time-tested protection of pure white lead plus the easy application. And that'll also get a pleasant surprise. For these new war-time kegs, in addition to being sturdy, are also *practical*—easy to open! They just cut, pull and pop—and there's there! Several Dutch Boy White Lead looking them in the eye.

And here's another way you can be happy with the shortage problem. Dutch Boy's new 10 lb. kegs are at it! Take out the cork, pull and pop—and there's there! Several Dutch Boy White Lead looking them in the eye.

When it comes to ready-to-use paint, the new Dutch Boy Paint is right in there helping paint the better Dutch Boy Pure White Lead all ready to spread in the open of future. (1) "I should mention" for extra mixing and loading. (2) "I should mention" for a tough bonding coat of ground painting.

Proof of war, your customers will find Dutch Boy "good choice for making things fine."

NEW WAR-TIME KEG
OPENS LIKE 1...2...3...

1. Cut through metal top ring, and outside collar (shown in case of best case) and it will do it...

2. Pin hand lever at top and pull completely all the way...

3. Pin out cover!

Right Dress?

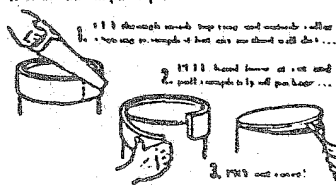

Standard Keg or War-time Keg...
Dutch Boy is the Same Husky Weather-Fighter!

His fighting face made steel on the Dutch Boy is "giving his shirt" and showing a war-time uniform of sturdy fiber.

But any way we dress him, he's the same good, powerful head at heart, ready to go on the job now and stay on the job long.

And his own uniform squares like one, two, three. Here are the simple steps:

Strongest Waterproof That's the new Dutch Boy Standard Waterproof! Let this new Dutch Boy help you keep your clothes dry.

It's still there—ready to start that hard job the new Dutch Boy Form is gone when he's all ready to start. And it comes back again. It's the new Dutch Boy Form that's the only one with extra strong and lasting power. It's the only one that's a tough bonding with no glued patches.

This ONE comes in TWO forms...

That's worth remembering - worth tying two strings around your fingers & remembering.

Because each of these two forms of Dutch Boy's trade-mark White Lead paint is designed to do a special job: (1) on new surfaces - for a first coat with extra sealing and hiding power (2) on worn white - for a finish coat or general painting with maximum durability and a better finish.

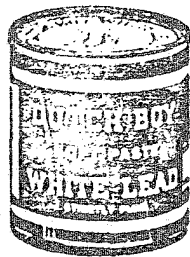

Both are pure white lead, both ready to spread. Together they give "hang-up" two coat results - even on new wood - results that "bring 'em back for more."

1. PRIMER

2. OUTSIDE WHITE

3. SOFT PASTE

All THREE come in ONE quality

Nobody has to tell you what high quality that is.

It's the quality which has built the Dutch Boy's good name - the unsurpassed quality of pure white lead - long famous in Dutch Boy Paste Lead.

And anybody whose sales depend on paint results, doesn't have to be told what White Lead means in durability and lasting beauty - his repeat business says it all.

Paste or paint - Dutch Boy is "first choice for making things last."

 Look ONCE and you see an old friend

How good?
Bright!

Dutch Boy Pure White Lead, the time-tested product that made the name Dutch Boy a "house" word for weather fighting, ever-lasting home protection.

Its low cost per mixed gallon and its adaptability to many surfaces make it a real helper to the painter on any type of work.

And when it comes to types of homes, Dutch Boy is the lead to get it for you—a white substance that sticks on the job and in your mind.

 Look TWICE and you see two new ones

Take a second look at the Dutch Boy's new paint and you'll see that it's really two paints—each with its own special sub-points:

1. **Interior Primer**—Here's superior lining and hiding power for the best result.
2. **Outside White**—Here's a weather-stamina and a long-lived whiteness for the best and most general painting.

And don't forget each is pure white lead, all ready to spread. Top that they give stand-up, stand-out finished results, even on the wood-trouble that make the house owner look twice, too!

TWO of a kind...

Here's another famous tandem - Dutch Boy Power & the Lead Paint!

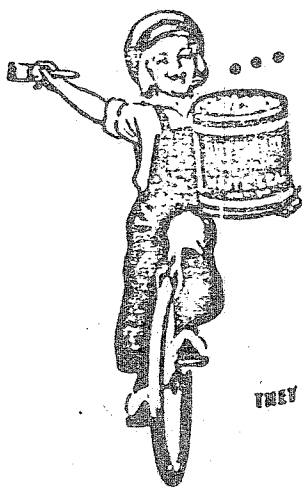

No number paint business goes for its two heads. Dutch Boy is specially mixed to do its own job well.

The Famous Power packs extra working and lasting into fast results...

The Dutch Boy has been all with more weather light and sparkling white for Dutch Boy's extra great painting...

Each is your white lead. Each means ready to spread. Together they team up to give more power to your performance - even on the road!

...or SOLO Performer

When a man is riding to success, too, with Dutch Boy Power & the Lead.

It has advantages all its own: good for most any surface - wood, brick, stone, concrete or plaster - and good and low in cost per mixed gallon of paint.

And, like all Dutch Boy, making better even come down the pipe for making a house stand up against the weather.

Power as Power, Dutch Boy is "First choice for making things last" - including your reputation for selling top quality products.

THEY ALL GO FOR
DUTCH BOY

REGISTERED TRADE MARK The Dutch Boy Power & the Lead Paint is a Dutch Boy product. Dutch Boy is a registered trademark of the Dutch Boy Paint Co. The Dutch Boy Paint Co. is a subsidiary of the Dutch Boy Paint Co.

This ONE comes in TWO forms...

That's worth remembering - with long two designs around your house or outside.

Because each of these two forms of Dutch Boy paint has its own special features. The first is a special white paint for interior walls and ceilings. The second is a special white paint for exterior walls and ceilings.

Both are pure white. Both last long in use. Both are the most popular "long life" paint in the world. Both are the most popular in a master's wardrobe.

1. PEARL

2. OUTDOOR WHITE

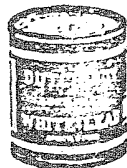

ALL THREE come in ONE quality

Which has to tell you what high quality that is. It's the quality which has made the Dutch Boy paint the most successful quality of pure white lead paint known in Dutch Boy's history.

And you know, a high quality paint must be good in every way. It must be good in its color, its texture, its durability, its economy, its ease of use, its safety, its healthfulness, its beauty, its value.

That's why Dutch Boy is "The Paint That Makes Things Last".

3. SOFT PASTE

Marching along together... in the WEIR AGAINST WEATHER!

Very much like the tale of childhood days, the story of White Lead protection begins a long, long time ago.

But unlike most of them, it's a story that really happened.

The early American home builders did use Pure White Lead to protect their simple dwellings against the cruel weather of the new world.

And as the nation grew, and these homesteads built and well-protected homes endured through the years, Pure White Lead earned its place beside the Architect as his ally in the never ending War Against Weather.

So today, it is not surprising to find the Architect and the Dutch Boy marching shoulder to shoulder.

The experience has shown the Architect that Dutch Boy Pure White Lead makes paint which hangs tight and lasts long... paint that won't crack and scale. He knows that houses and other structures protected with it will not only last, young families young - and that when repainting time finally rolls around, his customers won't have the expense of first burning and scraping off the old paint.

And here's the moral of this story: Dutch Boy Pure White Lead is the Architect's "Last thing for making things LAST."

To buy Dutch Boy is available but only in the long familiar Pure form. And it's the only lead paint in one Dutch Boy Pure White Lead form. The reason is the special form: it's Enamel Primer for a fast and hard paint surface and high surface finish and it's the only White for an equally durable working coat or for general purposes. Together they set a standard for the best protection - even on new wood.

Specs.

DUTCH BOY PURE WHITE LEAD

DEFENDS 100% WEATHER. It's the only lead paint in one Dutch Boy Pure White Lead form. The reason is the special form: it's Enamel Primer for a fast and hard paint surface and high surface finish and it's the only White for an equally durable working coat or for general purposes. ON GUARD, Rain or Shine, in the WAR AGAINST WEATHER!

Many of America's earliest structures are still standing today. Handmade by the simple houses with which they were built and to the working that dictated to, all painting with pure white lead.

Years ago, out through wind and rain, and dust, and sun, day in and day out, they were built in the most that these centuries of weather could offer.

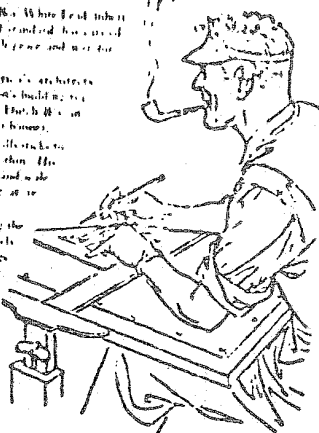

And Dutch Boy White Lead takes care of the present standard, has a record of long and strong life, and is the most durable.

No wonder America's architects are proud of the Nation's buildings, for Dutch Boy White Lead is the only white paint that lasts.

The flow in the White Lead is such that it goes through thick and thin. The flowing paint does not crack and is the perfect barrier and keeps out the weather.

How does Dutch Boy help the architect protect his property with the White Lead? The buildings come in the hands of all, and as he has to take care of his things, he has to.

Today, Dutch Boy is available, and all who have been told that Dutch Boy is the best, are ready to see that Dutch Boy is the best. The reason is the special formula of the White Lead. It is not just a paint, it is a paint that will come out and hold its place and it is the only White Lead on earth that is so durable. Dutch Boy is the standard for the paint industry.

DUTCH BOY PURE WHITE LEAD

See Dutch Boy Pure White Lead in all paint stores. It is the only white lead that is so durable. Dutch Boy is the standard for the paint industry.

BRIDGING OVER RAILROAD KEEP HIS BRIDGES UP

Red and hickory handles. In the transportation of heavy materials, the use of these handles must be kept up. They can be produced in a matter of 1000 with Dutch Boy Red Lead.

Time has proved that there is no more effective rust preventive paint for handles, ship tanks and other metal structures.

Dutch Boy Red Lead paint is a must.

Two men are shown in the foreground, one of whom is painting the handle of a tool. The other man is standing behind him, looking on. The scene is set outdoors, with a building visible in the background.

which produces the blue that shows light and is very resistant to the other kinds of damage. It is a water repellent paint and also a good metal preservative.

The photograph on the right shows an important factor contributing to the long life of a structure: the application of red lead paint. This is the foundation of its enduring life.

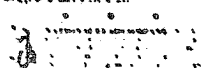

Another great factor in the life of a structure is its ability to resist a rusting of metal. The paint on the right will be interesting in this connection.

You can claim Dutch Boy Red Lead as a special kind of paint, in addition to the standard paint and paint house. The special kind of paint is available when the time must be held to a minimum. There are two types, one dry but retaining the red lead, the other but retaining the red lead.

A test report of the illustrated handle, coated with Dutch Boy Red Lead, is ready for you at our office branch office. Write for a copy.

It is a fact that the life of a structure is determined by the quality of the paint used. The paint on the right will be interesting in this connection. The special kind of paint is available when the time must be held to a minimum. There are two types, one dry but retaining the red lead, the other but retaining the red lead.

The "Knee" that makes men's knees *quiver*!

Yes, but many, undoubtedly, explain away such a finding by remarking that, of course, that sort of information has to become more than a passing fancy for people who are serious students of the history of ideas.

It is a pleasure to read of the good work done by the
people of the United States in the relief of the
famine in China. It is a relief to know that the
people of the United States are so generous and
kind. It is a relief to know that the people of
the United States are so united. It is a relief to
know that the people of the United States are so
generous and kind. It is a relief to know that
the people of the United States are so united.

[illegible]

We are very glad to hear you are well and hope
that you will continue to be so. We are all well
and hope you will soon be back home.

There is 23.4% increase in mean height in
dwarfed and normal height of the seed to seed
offspring. It is similar to the results of other
workers who have found that the dwarfed and
normal height of the seed to seed offsprings
are similar. The results of this study are in
agreement with the results of other workers
who have found that the dwarfed and normal
height of the seed to seed offsprings are similar.

There are no other persons in the household who are not of legal age and who are not of legal age. The only person in the household who is not of legal age is the son of the deceased, who is now 18 years of age and is a student at the University of Chicago. He is not of legal age because he is not yet 21 years of age.

For the purpose of the present investigation, the following data were obtained from the literature:

[illegible]

It is worth a mention that the people of the country are not only interested in the life of the people but also in the life of the people. The people of the country are not only interested in the life of the people but also in the life of the people. The people of the country are not only interested in the life of the people but also in the life of the people.

Give your GR-S Compounds heat stability provided by low sulfur content

Safe, fast curing now made possible by FBS LITHARGE

As you know, reduction in sulfur content means we have no heat stability. It has now been demonstrated that FBS Litharge (plus trace amounts of stabilizer) makes low sulfur formulas practicable. Why? Because it speeds up greatly the rate of cure without increasing the risk of re-curing. Thus, even though the normal quantity of accelerators is used, the sulfur content can be reduced. Note, in the series of tests shown and tabulated, the superior behavior of the 0.75 and 1.0 sulfur formulas.

FORMULA				
GR-S (Bromine)				100
5 Ph + carbon black				20
Free ZnO				5
Lead tetra acetate				5
Di-phenyl disulfide				10
5 Ph-Litharge				15
Stabilizer				variable

Effect of Varying Amounts of Sulfur on Physical Properties				
Curing period 30 min Temp 160 C				
Sulfur	Break Strength	Elongation	Modulus at 25°C	Low Temperature
0.75	2500	670	900	250
1.0	2800	650	1150	250
1.5	2600	650	1100	250
2.0	2600	670	1050	225

After Aging 24 Hours at 160 C				
0.75	1800	450	1200	300
1.0	1800	450	1100	300
1.5	1600	600	2000	250
2.0	2700	310	2200	250

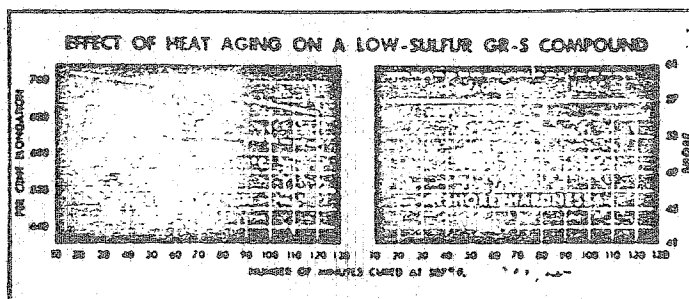

CONCLUSIONS:

1. FBS Litharge chemically reacts with low sulfur compounds to give stability.
2. Modulus is high and steady.
3. Flexibility is retained despite exposure to heat.
4. Heat stability prevents hardening and improves heat resistance.
5. Rate of cure is extremely fast, without tendency to overcure.
6. The combination is economical and efficient.

Ask us to send you a printed report, "Compounding of GR-S for Heat Resistance," issued by the Rubber Division of our Research Laboratories, which covers the subject of FBS Litharge for low sulfur formulas in greater detail and from a number of additional angles.

Heat build-up and heat stability... both improve when you compound GR-S with RED LEAD

Have you had difficulty making your GR-S compounds work both hot and cold? If so, try the right combination of red lead, benzothiazyl disulfide and sulfur. Its combination is uniquely active and efficient to provide consistent, reliable stability and low heat build-up. Run the following table and the accompanying sheets.

FORMULA				
GR-S (hard stock)	100			
RED LEAD	20			
Benzothiazyl disulfide	2.0			
Sulfur	2.0			
Sum of GR-S and Red Lead	120			
Heat stability (hours)	100			
Physical Properties				
Temp. (°F)	Temp. (°C)	Tensile (psi)	Elongation (%)	Modulus (psi)
11	120	200	315	20
20	160	200	200	20
30	180	200	150	20
40	200	200	100	20
50	220	200	75	20
60	240	200	50	20
70	260	200	25	20
80	280	200	10	20
90	300	200	5	20
100	320	200	2	20
110	340	200	1	20
120	360	200	0.5	20
Aged Comp. Stock at 160 °C				
Temp. (°F)	Temp. (°C)	Tensile (psi)	Elongation (%)	Modulus (psi)
11	120	200	315	20
20	160	200	200	20
30	180	200	150	20
40	200	200	100	20
50	220	200	75	20
60	240	200	50	20

Any way we dress it...

...it's still Pure White Lead!

The Dutch Boy's metal kegs are going to war - helping put steel into the weapons of Victory - as even his famous Paste White Lead is being packed in sturdy, fiber war-time kegs.

When you wrap up with them, remember nothing's changed but the package. You still get the time-tried protection of pure white lead plus the easy application you want. And you'll also get a pleasant surprise. For these new war-time kegs, in addition to being sturdy, are also one piece, easy to open. Just cut, pull and pop - and there's your old friend Dutch Boy White Lead, looking just as in the eye.

And there's another way we're helping to help the shortage problem. Dutch Boy Paste White Lead is now in 1 lb. Tubs - one in each lot's band - so that you can be sure you get it just when you need it.

When it comes to ready-to-use paint, the new Dutch Boy Paste is also made in this handy size. You get the same fruit that's been in the Dutch Boy Paste, all ready to open in its own special tub. (1) "The Great Primer" for extra adhesion and holding. (2) "Sturdy 2" for a tough, hard-wearing coat of protection.

From now on, make Dutch Boy your "first choice for making things last."

EE-212—General Motors Magazine, January, 1942

NEW WAR-TIME KEG OPENS LIKE 1...2...3...

1. Cut through mark top ring and outside collar - leaving in one of last one so that it will stay...

2. Pry head loose at cut and pull completely off package...

3. Pry out cover!

NOTICE: If the film image is less clear than this notice, it is due to the quality of the document being filmed

...One Reason White Lead has *More* of the Properties that make Good House Paint

There is no pretty picture as a paint can should not be...

It's a photograph of the "lead soap" formation that helps explain many of White Lead's contributions to paint.

Read the facts about lead soaps before and you'll agree they're "facts of life" when it comes to putting lasting paint on a paint film. For they help show why Royal Carbide White Lead produces a more durable paint film, with greater resistance to fading, abrasion and weathering.

But there are only a few of the many reasons why Royal Carbide White Lead imparts to a paint. Check the complete list and you'll see why one White Lead adds up to more of the paint making properties you want than any other white pigment.

The facts about "LEAD SOAPS"

White Lead combines with oil to produce a different type of "soap" formation, with a chemical structure resulting in a more durable paint film.

The illustration above shows how the soap spreads out and contributes to...

Check it against any other pigment for

1. MIXING AND GRINDING EASE
2. PRIMER STABILITY
3. HIDE
4. BRUSHABILITY
5. LEVELLING

9. FILM STRENGTH
10. FLEXIBILITY
11. TINT RETENTION
12. ADHESION
13. GLOSS
14. WEATHER RESISTANCE

before the paint film giving it greater toughness and weather resistance.

It is also characteristic of "lead soaps" that they allow maximum oil along their interlocking projections. This is known as the "oil film" and it is the plastic bond of the dried oil film and the soap particles is considered the "true" paint film. This action helps prevent the separation of the paint film, resulting in a more durable paint film in which the soap particles both are dispersing and adhering.

The tendency of white lead to react with moisture and also explains why the pigment stays steady and thus makes and grades well.

Let's get our heads together

On the whole, we have the idea that if we make more of these soap particles, we make more of paint. That's true, but we have to be sure all lead soaps are made in the same way. Let's get our heads together and see where the lead soap is the best. It's not where the lead soap is the best, it's where the lead soap is the best.

No oil can fit all formulations and produce price requirements. "Seven-Ten" doesn't claim to. But one thing is sure: With Tungs, Perilla and others on the unsatisfactory in name list, you are overlooking a good bet if you don't try this new, fast bodying oil which is being so favorably received all around.

	Quantity	Quantity	Quantity
	1	25	100
Vacuum at 20 in.	9	65	600
Specific Gravity - 15.5° C.	0.873	0.875	0.878
Weight per gal. (160 lb.)	6.04	6.04	6.07
Boiling point (°C.)	120	120	120
Acid Number	12	14	16
Isoline Number	104	104	100
Refractive Index	1.464	1.464	1.464
Color (ASTM)	14	14	15
Set Time at 165° F.	90 Min.	55 Min.	20 Min.

The above gel times give a good idea of the bodying rates of Seven-Ten Oil. The time-saving feature of this oil is shown further by the following direct comparison:

...LEAD SOAPS help give White Lead *More* of the Properties that make Good Paint

Every barrelful of paint your customers use is a silent salesman for your product - a witness to the skill with which it was formulated.

And every barrelful does a better job when it contains Fluor Carbonate White Lead.

One reason is White Lead's unusual ability to form "lead soaps." As explained at the right, these lead soap formations give the paint film greater adhesion, flexibility, toughness and weather-resistance.

But White Lead helps in many other ways too - from mixing right on through. In fact, this versatile pigment has more of the properties that make good house paint than any other white pigment. Check its advantages and see if you don't agree.

The "Why" of LEAD SOAPS

The paint you use is made of many things. One of the most important is the pigment. It is the pigment that gives the paint its color and its hiding power.

In other words, the pigment is the heart of the paint. It is the pigment that gives the paint its color and its hiding power. It is the pigment that gives the paint its color and its hiding power.

One important thing to remember is that the pigment must be well mixed with the other ingredients of the paint. If it is not, the paint will not be as good as it should be.

White Lead has *More* of the Properties
that make Good House Paint

The ground on many points was covered by
Black Carbonate. While Lead Fire was
now apparent over North a hard every
step of the way right in the back line
mining and grinding to western light.

In fact, White Land has more of the properties that make good paper than any other white pigment. Run this one up the slope of pencil curves above and check these qualities for yourself.

These White Land advantages are not just claims but are borne out by years of results both in the field and the laboratory. They're also reinforced by the highest & most famous world-class testing projects and record 37 years of research on other

State of a wide variety of different plant
 communities. Study of our First Experi-
 ment Station at Sayville, Long Island.
 Still another "theory in borrowing" dom-

contrast of White Lead's poster showing "plaster" is reproduced in the photograph at the right. This shows how the "lead wrap" structure formed when White Lead starts with a "brush" under the good plan.

Add it all up and you'll see why White Lead's record has gleamed so brightly through the years and why paint men accept White Lead as the starting point in house-paint formulation.

One of his secrets... "HAS 1047"

The following paragraph is taken from the "Journal of the American Medical Association" for the week of June 1, 1910. It is a very interesting and important one, and is well worth reading. It is a very good example of the kind of writing that is needed in the medical profession. It is a very good example of the kind of writing that is needed in the medical profession.

White Lead has *More* of the Properties that make Good Paint

Like the quotations, these five points have something in common. They're all Basic Characteristics of Lead. And that means they all offer you the 14 points making "payers" kind of the right - many of which are directly traceable to White Lead's remarkable ability to form lead bodies, as explained under the photomicrograph.

But - like the quotations - these five White Leads are all different. Each has its own special characteristics - its own degree of oil absorption, hiding and paint-thickening power, its own particular place in your formulation.

Let our technical staff lay before you full information on why Basic Characteristics White Lead has more of the paint-making qualities you want than any other white pigment. Get the benefit, too, of our records covering 27 years of continuous paint testing on many different types of formulae, the biggest outside paint research project on record.

Take advantage of the strength of practical knowledge. Don't let it with you, your paint making some and use which of the Dutch Boy's five White Leads will fit into your process and product plans to your advantage. Write or phone our nearest office.

Check it against any other pigment for

The "Leap" that makes Paint Better

Many of White Lead's advantages in paint-making result from the "lead leaps" formed when the pigment reacts with oil. As shown in the photomicrograph above, each through lead body structure has a network from which radiate multiple projections. These snap formations mechanically reinforce the paint film, giving it greater toughness and weather resistance.

They also allow movement all along these intermeshing projections. This action helps prevent the ruptures to which a hard, unyielding film is subject - improves both elasticity and adhesion.

The tendency of White Lead to react with linseed oil also explains why this pigment mixes easily and then dries and grinds well.

Any way we dress, it...

...It's still Pure White Lead!

The Dutch Boy's method of getting on the job has put ahead into the forefront of the paint business the famous Dutch White Lead in being put in standard blue and red cans. When you meet up with the same color, nothing's changed but the package. You still get the same tried and true paint of pure white lead plus the extra advantages you want. And you'll also get a pleasant surprise. For there's a surprise here, an addition to being sturdy, one that makes your paint more useful, just not just and put - and there's more still to find. Dutch Boy's White Lead, looking new on the job.

And there's another way you're to find to the shortage problem. Dutch Boy's famous Blue Plus can be used. Take care to work this paint but at the same time be sure you'll get it. It's enough to even in the short.

When it comes to ready-to-use paint, the way to Dutch Boy's is not in the right way to the paint you picture the house from. Don't forget it. Pure White Lead, all in all, is the best for your spread house. (1) "Pure White Lead" for extra strong and lasting. (2) "Blue Plus" for a tough finishing coat in general painting.

There's no one, Dutch Boy's in "Pure White Lead" for making things last.

DUTCH BOY'S COMPASS
 1. The first coat of paint is applied to the surface.
 2. The second coat is applied to the surface.
 3. The third coat is applied to the surface.
 4. The fourth coat is applied to the surface.
 5. The fifth coat is applied to the surface.

What's worth knowing.

Barack and Michelle Obama are not the first African American couple to be elected President and Vice President of the United States. In 1968, Hubert H. Humphrey and his wife, Beulah, were the first African American couple to be elected to the same office. In 1976, Jimmy Carter and Rosalynn Carter were the first African American couple to be elected to the same office. In 1980, Ronald Reagan and Nancy Reagan were the first African American couple to be elected to the same office. In 1984, George H. W. Bush and Barbara Bush were the first African American couple to be elected to the same office. In 1988, George Bush and Barbara Bush were the first African American couple to be elected to the same office. In 1992, Bill Clinton and Hillary Clinton were the first African American couple to be elected to the same office. In 1996, Al Gore and Tipper Gore were the first African American couple to be elected to the same office. In 2000, George W. Bush and Laura Bush were the first African American couple to be elected to the same office. In 2004, George W. Bush and Laura Bush were the first African American couple to be elected to the same office. In 2008, Barack and Michelle Obama were the first African American couple to be elected to the same office. In 2012, Barack and Michelle Obama were the first African American couple to be elected to the same office. In 2016, Donald Trump and Melania Trump were the first African American couple to be elected to the same office. In 2020, Joe Biden and Kamala Harris were the first African American couple to be elected to the same office.

Our Battle Flags Are Flying High!

You see it all the people do today, and the more and more - the National Lead family is fighting on many fronts.

1. First, it's pouring forth an endless stream of lead - lead for bullets - lead for submarine batteries - lead for the hundreds of tons for a thousand war jobs which lead right here.
2. And of course we're making real point pig-iron and steel wire rods to protect our war machines, our ships and battleships and battleships.
3. But did you know that National Lead has already done over eight a complete plant to turn out work needed everywhere - the vital ingredients of secondary metals.

4. Did you know that it equipped one of its plants for lead with a machine of almost the highest concentrated sulphuric acid used in making high explosives.
5. Did you know that tools and more and more are rolling here and our batteries produced by the family of the lead in the metal.
6. In fact there's hardly a war machine or a fighting front - from learning to machine, from sea bottom to atmosphere - where the products of National Lead Company are not helping beside.

After which they'll help you build a world of peace. National Lead Company, 111 Broadway, New York 6, N.Y.

From Bullet Lead to Diesel Engine Bearings
the Dutch Boy is Delivering the Goods!

Yes, the boy in the blue overalls is doing a man's job for his fighting Uncle Sam.

As you might expect, he's turning out all manner of products to help the war effort — lead for bullets, lead for storage batteries, lead for auto planes. And he's making road paint, primers and oils to protect our battle machines, our ships, railroads and our planes.

But that's not all, in fact the way they're doing the heavy and brutal job of the lead National Lead factories and more are pouring forth a host of other fighting materials, needed to blow the war as far from A plane was built then "struck" without our magnesium — without which you can't make invulnerable bombs. A mine was opened in the middle of the Atlantic to mount a mountain of ore from which comes titanium pig — important in making protective coatings, paper, oiling tanks.

Another most useful product made and marketed by National Lead is a special die mold used by practically all the aircraft factories of the country to stamp out plane parts faster and give our planes the most advanced shape on the air.

Also a number of the Dutch Boy family is delivering its facilities to cutting out precision built Diesel engine bearings for submarines and other Navy craft. Still another is making various precision products to drill for the life blood of war with more speed and speed.

Yes, the boy is a big family — doing a big job on these and many other fronts. . . . between the days when the Dutch Boy can again turn to the job of better living for Uncle Sam's boys and their families. National Lead Company, 111 Broadway, New York 10, N. Y.

Boy War Goods

National Lead Company

2. Here follow your standard 100% only answer: I am a 100% male, probably socialist, and I am a 100% American. As a result, we make no money, and we are in the process of putting and busting the system.

and of information as to the nature of the matter and the
proceedings

Friday had temperatures below zero temperatures but the snow the Indians developed a bad cold which was not cured. The great winter festival is coming in a few days and will be as usual the working day for some time.

The Bureau had no facilities so some 2000' of
 its structure was built by working out
 the genius of Williamson had the one hope to grow
 into a business but a corporation was needed to take
 care, there was a technical company of Williamson had
 in mind at that time. But we decided, showed the great
 change in that. That has been the great growth in the
 corporation up to 1914. It is believed to be the best
 thing from the viewpoint of American business and
 that of the world.

Where it is used, Y. thomasi is not so widely used as
some of the other species and is not so common. It is not
so common as the other species and is not so common as the
other species and is not so common as the other species.

Among the reported, the most representative are those
of the 1st, 2nd, 3rd, 4th, 5th, 6th, 7th, 8th, 9th, 10th, 11th, 12th, 13th, 14th, 15th, 16th, 17th, 18th, 19th, 20th, 21st, 22nd, 23rd, 24th, 25th, 26th, 27th, 28th, 29th, 30th, 31st, 32nd, 33rd, 34th, 35th, 36th, 37th, 38th, 39th, 40th, 41st, 42nd, 43rd, 44th, 45th, 46th, 47th, 48th, 49th, 50th, 51st, 52nd, 53rd, 54th, 55th, 56th, 57th, 58th, 59th, 60th, 61st, 62nd, 63rd, 64th, 65th, 66th, 67th, 68th, 69th, 70th, 71st, 72nd, 73rd, 74th, 75th, 76th, 77th, 78th, 79th, 80th, 81st, 82nd, 83rd, 84th, 85th, 86th, 87th, 88th, 89th, 90th, 91st, 92nd, 93rd, 94th, 95th, 96th, 97th, 98th, 99th, 100th, 101st, 102nd, 103rd, 104th, 105th, 106th, 107th, 108th, 109th, 110th, 111th, 112th, 113th, 114th, 115th, 116th, 117th, 118th, 119th, 120th, 121st, 122nd, 123rd, 124th, 125th, 126th, 127th, 128th, 129th, 130th, 131st, 132nd, 133rd, 134th, 135th, 136th, 137th, 138th, 139th, 140th, 141st, 142nd, 143rd, 144th, 145th, 146th, 147th, 148th, 149th, 150th, 151st, 152nd, 153rd, 154th, 155th, 156th, 157th, 158th, 159th, 160th, 161st, 162nd, 163rd, 164th, 165th, 166th, 167th, 168th, 169th, 170th, 171st, 172nd, 173rd, 174th, 175th, 176th, 177th, 178th, 179th, 180th, 181st, 182nd, 183rd, 184th, 185th, 186th, 187th, 188th, 189th, 190th, 191st, 192nd, 193rd, 194th, 195th, 196th, 197th, 198th, 199th, 200th, 201st, 202nd, 203rd, 204th, 205th, 206th, 207th, 208th, 209th, 210th, 211th, 212th, 213th, 214th, 215th, 216th, 217th, 218th, 219th, 220th, 221st, 222nd, 223rd, 224th, 225th, 226th, 227th, 228th, 229th, 230th, 231st, 232nd, 233rd, 234th, 235th, 236th, 237th, 238th, 239th, 240th, 241st, 242nd, 243rd, 244th, 245th, 246th, 247th, 248th, 249th, 250th, 251st, 252nd, 253rd, 254th, 255th, 256th, 257th, 258th, 259th, 260th, 261st, 262nd, 263rd, 264th, 265th, 266th, 267th, 268th, 269th, 270th, 271st, 272nd, 273rd, 274th, 275th, 276th, 277th, 278th, 279th, 280th, 281st, 282nd, 283rd, 284th, 285th, 286th, 287th, 288th, 289th, 290th, 291st, 292nd, 293rd, 294th, 295th, 296th, 297th, 298th, 299th, 300th, 301st, 302nd, 303rd, 304th, 305th, 306th, 307th, 308th, 309th, 310th, 311th, 312th, 313th, 314th, 315th, 316th, 317th, 318th, 319th, 320th, 321st, 322nd, 323rd, 324th, 325th, 326th, 327th, 328th, 329th, 330th, 331st, 332nd, 333rd, 334th, 335th, 336th, 337th, 338th, 339th, 340th, 341st, 342nd, 343rd, 344th, 345th, 346th, 347th, 348th, 349th, 350th, 351st, 352nd, 353rd, 354th, 355th, 356th, 357th, 358th, 359th, 360th, 361st, 362nd, 363rd, 364th, 365th, 366th, 367th, 368th, 369th, 370th, 371st, 372nd, 373rd, 374th, 375th, 376th, 377th, 378th, 379th, 380th, 381st, 382nd, 383rd, 384th, 385th, 386th, 387th, 388th, 389th, 390th, 391st, 392nd, 393rd, 394th, 395th, 396th, 397th, 398th, 399th, 400th, 401st, 402nd, 403rd, 404th, 405th, 406th, 407th, 408th, 409th, 410th, 411th, 412th, 413th, 414th, 415th, 416th, 417th, 418th, 419th, 420th, 421st, 422nd, 423rd, 424th, 425th, 426th, 427th, 428th, 429th, 430th, 431st, 432nd, 433rd, 434th, 435th, 436th, 437th, 438th, 439th, 440th, 441st, 442nd, 443rd, 444th, 445th, 446th, 447th, 448th, 449th, 450th, 451st, 452nd, 453rd, 454th, 455th, 456th, 457th, 458th, 459th, 460th, 461st, 462nd, 463rd, 464th, 465th, 466th, 467th, 468th, 469th, 470th, 471st, 472nd, 473rd, 474th, 475th, 476th, 477th, 478th, 479th, 480th, 481st, 482nd, 483rd, 484th, 485th, 486th, 487th, 488th, 489th, 490th, 491st, 492nd, 493rd, 494th, 495th, 496th, 497th, 498th, 499th, 500th, 501st, 502nd, 503rd, 504th, 505th, 506th, 507th, 508th, 509th, 510th, 511th, 512th, 513th, 514th, 515th, 516th, 517th, 518th, 519th, 520th, 521st, 522nd, 523rd, 524th, 525th, 526th, 527th, 528th, 529th, 530th, 531st, 532nd, 533rd, 534th, 535th, 536th, 537th, 538th, 539th, 540th, 541st, 542nd, 543rd, 544th, 545th, 546th, 547th, 548th, 549th, 550th, 551st, 552nd, 553rd, 554th, 555th, 556th, 557th, 558th, 559th, 560th, 561st, 562nd, 563rd, 564th, 565th, 566th, 567th, 568th, 569th, 570th, 571st, 572nd, 573rd, 574th, 575th, 576th, 577th, 578th, 579th, 580th, 581st, 582nd, 583rd, 584th, 585th, 586th, 587th, 588th, 589th, 590th, 591st, 592nd, 593rd, 594th, 595th, 596th, 597th, 598th, 599th, 600th, 601st, 602nd, 603rd, 604th, 605th, 606th, 607th, 608th, 609th, 610th, 611th, 612th, 613th, 614th, 615th, 616th, 617th, 618th, 619th, 620th, 621st, 622nd, 623rd, 624th, 625th, 626th, 627th, 628th, 629th, 630th, 631st, 632nd, 633rd, 634th, 635th, 636th, 637th, 638th, 639th, 640th, 641st, 642nd, 643rd, 644th, 645th, 646th, 647th, 648th, 649th, 650th, 651st, 652nd, 653rd, 654th, 655th, 656th, 657th, 658th, 659th, 660th, 661st, 662nd, 663rd, 664th, 665th, 666th, 667th, 668th, 669th, 670th, 671st, 672nd, 673rd, 674th, 675th, 676th, 677th, 678th, 679th, 680th, 681st, 682nd, 683rd, 684th, 685th, 686th, 687th, 688th, 689th, 690th, 691st, 692nd, 693rd, 694th, 695th, 696th, 697th, 698th,

WHAT WERE REPORT

On these occasions, a number of local farmers, who had been told that the Government was going to buy their produce, were disappointed to find that the Government had no money to pay for it. The Government had to pay for the produce of the previous year, but it had no money to pay for the produce of the current year. The Government had to pay for the produce of the previous year, but it had no money to pay for the produce of the current year. The Government had to pay for the produce of the previous year, but it had no money to pay for the produce of the current year.

College had a staff of 100
the report to the President
and the President's Commission
on the subject of the
College's future.

TELLURIUM LEAD DATA SHEET

SUBJECT: *Elevated Temperatures in Acid Equipment*

Best illustration: These plates show the appearance of tellurium lead equipment after exposure to acid for 100 hours.

Each piece of equipment on the physical properties of tellurium lead is listed in the table on the right.

In a number of places, tellurium lead has made possible the equipment in various applications. In some cases, the equipment has made the work of the user, and in some cases, the equipment has made the work of the user, and in some cases, the equipment has made the work of the user.

Final test: Laboratory tests of tellurium lead in various applications have shown that the equipment is suitable for use in various applications.

In a typical test, tellurium lead was exposed to acid for 100 hours. The results of the test are shown in the table on the right.

Tellurium lead is a material which is suitable for use in various applications. It is a material which is suitable for use in various applications. It is a material which is suitable for use in various applications.

There are also other applications of tellurium lead. In some cases, the equipment has made the work of the user, and in some cases, the equipment has made the work of the user.

Through the application of tellurium lead, the equipment has made the work of the user, and in some cases, the equipment has made the work of the user.

The equipment has made the work of the user, and in some cases, the equipment has made the work of the user.

There are also other applications of tellurium lead. In some cases, the equipment has made the work of the user, and in some cases, the equipment has made the work of the user.

Tellurium lead is a material which is suitable for use in various applications. It is a material which is suitable for use in various applications. It is a material which is suitable for use in various applications.

Use of tellurium lead: Tellurium lead is used in various applications. It is a material which is suitable for use in various applications.

Types of corrosion products in tellurium lead are shown in the table on the right.

Types of corrosion products in tellurium lead are shown in the table on the right.

Types of corrosion products in tellurium lead are shown in the table on the right.

TYPICAL TEST RESULTS

The results of the test are shown in the table on the right.

The results of the test are shown in the table on the right.

The results of the test are shown in the table on the right.

The results of the test are shown in the table on the right.
