

Inter-Office Memo

TENNECO CHEMICALS, INC.

To	D. H. Weintraub	At	Piscataway	Date	December 12, 1969
From	H. B. Carr	At	Burlington	Copy to	E. J. Hourihan C. W. Johnston E. L. Kanyok F. W. Kanzler R. D. Richards G. I. Rozand A. V. Wagner M. W. Williams (2)
Subject	Sipex (Alcolac)				

As we discussed on 12/11/69, Don, you agreed to contact Alcolac regarding the following points:

1. To confirm my phone conversation with Morris Warren of Alcolac on 11/25/69, the brookfield viscosity specification for Sipex will be 50 to 100 cps (LV #1, 20 rpm, 25°C).
2. Arrange for a 10°C maximum specification on Cloud Point.
3. Determine the cost differential if we request heated truck shipments maintained at temperatures above the Cloud Point.

Points 1 and 2 will be covered in a revised Raw Material Specification for Sipex.

H. B. Carr
