DOCUMENT DESCRIPTION: Letter to Dr. Vorwald from J.P. Woodard

March 8, 1938

Mrs. A. H. Kline
Executive Secretary to
C. V. Truesdell, M. D.
The Saranac Laboratory
Saranac Lake, New York

NOTED
V.B.

Dear Mrs. Kline:

Thanks very much for your letter of March 5 in which you tell us that you will soon be putting full attention on the preparation of the asbestos paper and that you anticipate that the material will be in our hands before the end of the month for our review and suggestions.

Inasmuch as the published paper will be developed from the report with which we are already familiar and since it is our wish that the article be published just as quickly as it can, in the interest of saving time it should not be sent to us for any review prior to publication.

I assume that preliminary arrangements have already been made with the Journal of Industrial Hygiene so that the publication of the article will follow very soon after you have completed it. We have have done nothing because it was the understanding that Saranac would make arrangements for the publication.

Not only our own company, but all the others who were in the group underwriting the Saranac program on asbestos are keenly interested in the publication of the article just as soon as it can be accomplished.

Very sincerely yours,

F. P. Woodard

Kline copies to:
A. J. Lanza, M. D.
Vanderbilt Group

AJL and VBK: Here is our latest report on the status of this article. I hope I am right in assuming that Saranac will have made preliminary arrangements with the publisher so that not too much time will elapse between completion of the article and its publication. It was the understanding that they would do this.

JFW
