TO: Vinyl Chloride Project Panel
Vinyl Chloride Research Coordinators

SUBJECT: An Epidemiological Study of Respiratory Disease in
Workers Exposed to Polyvinyl Chloride Dust, A Study
Completed by the Institute of Occupational Medicine,
Edinburgh, Scotland under Contract with Imperial
Chemical Industries Limited.

Gentlemen:

Attached is a final summary statement on the subject
document drafted originally by Mr. R. N. Wheeler, approved
by the counsels for both CMA and ICI, and checked for technical
accuracy after editing and/or modifying by counsel.

During the meeting of the Research Coordinators on
November 28, 1979, it was agreed that the subject document in
final form would be sent to all members of the Vinyl Chloride
Project Panel and to the Research Coordinators.

Sincerely,

J. T. Seawell
Project Administrator
Vinyl Chloride
