Dear Steve:

Enclosed, please find Metro Probe's report delineating the results of our Investigation on .

REDACTED

Although the surveillances and preliminary data failed to elicit any evidence that is currently employed, the subject was observed and videotaped smoking a cigarette. Although the actual footage of this activity is brief, it succinctly exhibits a cigarette protruding from mouth, as he carried a 6-pack of beer into his residence (accompanied by his son). Please note, Steve, that although there are several other still photos of the subject, we felt it best to capture him smoking on video tape as opposed to still prints.

REDACTED

I trust you will find the results of this Investigation interesting. Should you have any questions, however, or if we can be of further assistance to you on this matter, please feel free to call.

Yours truly,

Teri N. Malham
