Subject: Please ban Methylene Chloride

Our friends, ([Ex. 6 Personal Privacy (PP)]) from Folly Beach SC, lost their son ([Ex. 6 Personal Privacy (PP)]) this past Fall, at age 31 to toxic inhalation of Methylene Chloride in a product (Goof Off) which he was using to strip the floors of his start up business. He was very healthy, college educated, not one to cut corners, co-owner of an up and coming coffee business here in CHS.

His autopsy has proven that this was the cause of his death. He was wearing an approved respirator mask and all of the coverings that the product instructions indicated. This was a totally preventable death and I would like your help in keeping our loved ones from potentially suffering the same fate, just by using a product that is readily available at Lowes, Home Depot and other hardware stores throughout our country.

The EPA has delayed indefinitely acting on a ban of Methylene Chloride, despite the fact that it is banned for use by the US Military and the European Union since 2013.
