CC: J. C. Landwehr

SUBJECT : AROCLOR 5460

REFERENCE :

TO : Cumming Paton - G.O.

The samples of Aroclor 5460 requested in your letter of November 26 have been forwarded to Bill Coaker for EVA hot melt evaluation. I have advised Bill that I think it is necessary to check the insoluble portion of these samples and to make sure we are doing evaluation testing on Aroclor 5460 with over-chlorinated terphenyl present as opposed to over-chlorinated biphenyl.
