DOCUMENT DESCRIPTION: Letter to Dr. Vorwald from J.P. Woodward RE 'Uniform Industrial Hygiene Code'

April 19, 1949

Dr. A. J. Vorwald, Director
The Saranac Laboratory
Saranac Lake, New York

Dear Art:

Hugh Jackson just received from the Federal Security Agency, Public Health Service, Washington, D. C., a "Uniform Industrial Hygiene Code" issued by the American Conference of Governmental Hygienists, dated April 1949.

This Code, of which you possibly have a copy, gives the threshold limits for various types of dusts, in some of which we are, of course, interested.

The information that will doubtless be forthcoming in the article that will be published about the effects of asbestos dust will, I am sure, be very helpful to these people, and I am wondering when you now expect that the article will be in our hands for review. You mentioned this in your letter of February 14, and while we raised a question as to the approximate date of publication in our letter to you of March 8, this question was not covered in the reply that came back, which was written during your absence.

Yours sincerely,

J. P. Woodard
