In re: All Asbestos Litigation Filed by The Simmons Firm, Circuit Court, Third Judicial District, Madison Cty., IL; 8/28/03

"2" - Low and medium friction Carlisle products that can be replaced by currently approved NAB materials. Please contact me with your intentions and timing to replace these part numbers for a 7/1/87 production changeout.

"3" - High friction Abex products with applications suspected as requiring new, not yet approved NAB materials. No immediate action is required. Please review the applications of these part numbers. Contact me with your requirements for assistance to release new NAB materials for a production changeout of 1/1/88.

"4" - Low and medium friction Abex asbestos products that can be replaced by currently approved NAB products. No immediate action required. Please identify your requirements for the creation of replacement part numbers for a 1/1/88 production changeout.

EATON

"5" - BSI asbestos linings, no indication from supplier as to requirements for a production phase out.

"6" - Brake assembly part numbers where application information is unidentified in Eaton records. Please review immediately and supply vehicle parameters that will allow judgment as to which category above in which they should be included. If category "1" is identified, these volumes must be included in stockpile numbers.

If the above program does not suit your company's requirements, please notify us as quickly as possible.

Sincerely,

Larry W. Hopper
Account Manager
