Monsanto Chemical Company
St. Louis 4, Missouri

Dear Sir:

Going through our files I found a bulletin issued by your company in September 1949 dealing with the heating of Aroclor. The Bulletin was (Monsanto Technical Bulletin No. P-130). In this bulletin you mention the design and operation of heaters used successfully by Monsanto plants.

We are interested in getting information concerning gas fired heaters with rating from 500,000 Btu's to 40,000,000 Btu's.

I was wondering if you could supply us with the names and address of some companies manufacturing this type of equipment.

Sincerely yours,

Hupp Corporation
