RE: ASBESTOS SUBSTITUTES FOR POTROOMS

Past activities on asbestos substitutes for potrooms have been handled by Mr. J. M. McCollum. Because of Mickey's assignment to the Mechanical Engineering--Electrode Department, it is appropriate that his duties be reassigned.

In the future, coordination of efforts for obtaining asbestos substitutes will be handled by Dale R. Peinecke of the Mechanical Engineering--Potrooms Department. Potroom applications actively being studied at this time are:

1. Cradle to Potshell Insulation
2. Superstructure Foot Insulation
3. Pot Cover Insulation
4. Walkway Grating Insulation
5. Bus Insulation
6. Exhaust Duct Gaskets
7. Syphon Gaskets
8. Ladle and Ladle Lid Seal
9. Pot Exhaust Duct

Please contact Dale for any of the asbestos substitute items for potrooms.
