March 21, 1984

Union Carbide Corp.
Technical Center - Bldg. 725
3200 Kanawha Turnpike
S. Charleston, WV 25303
Attn: Ms. Lois Ford

Dear Ms. Ford:

On March 15, 1984, three 1-gallon samples of Vinylidene Chloride were shipped to you from Lake Charles, Louisiana via UPS.

Even though this product is very useful, you should be aware of its hazards and safe handling. Accordingly, we are enclosing the following warning and informational items.

MATERIAL SAFETY DATA SHEET

PRODUCT BULLETIN

Vinylidene Chloride (9/80)

120A (8/80)

You should be aware of the hazards, proper handling and use of such products. PPG urges you, and it is your duty, to pass the warnings and information in the enclosed items along to your employees, customers, handlers, or users of such products. The same principle applies to any product made by you from the PPG products.

Even though PPG is furnishing this information to you, it is not necessarily all-encompassing; therefore, it is recommended that you should consult with knowledgeable people of your choice in order to determine whether your Safety Programs and warnings are adequate and/or in compliance with any laws or regulations.

Our New York Area Sales Office would be glad to receive your evaluation of these samples and provide additional information.

Sincerely,

Lois L. Roberts
