

SIR CHARLES DODDS
(ENGLAND)

KE 0010380

N29846

Applied Physiology,
Eden Avenue,
Cincinnati, Ohio.

Dear Kehoe,

Thank you very much for your letter which I have studied with great interest.

I passed on the results of our discussion in the laboratory to Davison and he is very grateful for the information. I have also discussed my visit to you with the people who are all most anxious to have the benefit of your knowledge on the medical side of the new ventures. I think Davison is now informed with regard to the progress of the new work and I understand that this has not yet started and that it will take at least another year.

As I told you, I am very anxious that when I leaves my Department I should still have an active role on the lead problem in the Department, as I should not want my work to be shut up altogether.

I hope that you will come over to see us soon to be sure that we could give you a very interesting tour. The people are most anxious to see you and we should like to talk to you about the work we have done at the University of Cincinnati in the Diploma of Industrial Health.

With best wishes to Mrs. Kehoe and yours,

I remain,

Yours sincerely,
[Signature]
