D. L. Carter indicated that he would have complete by week-end the following:

AIA sample results and IH sampling from 92-94.

Medical surveillance data will go back one year (1993) and current year for PFT. The results will be expressed in total complete PFT's and % abnormalities broken out by obstructive and restrictive findings.

Chest X-rays will be cited as total number with % normal and % abnormal findings.

You and Dr. Paul and I will have an opportunity to review the data prior to it's submittal to the UAW next week.
