

Which car is equipped with NAPA VARI-LOAD variable rate coil springs?

Both of them!

With NAPA Vari-Load variable rate coil springs, your customer's vehicle always rides smooth and comfortable... and at normal height, whether loaded normally or loaded down with up to 1,000 pounds of extra weight. Vari-Load's special variable rate design allows it to adjust automatically

to changes in loads; eliminating sag, side slip and other problems caused by overloads.

NAPA Vari-Load springs are available for virtually every popular coil spring equipped make and model, so you'll have the answer next time one of your customers has an overload problem with his car or light truck.
