DR. JAMES WEBSTER
(Transcript January 16, 1987)

"Q Okay. Did you put Table 10 in here because you believed that the effects of the furans are the same as the effects of 2,3,7,8-dioxin?

"A No, not at all. I do not believe they are the same. The reason the Table was put in was because this is the only opportunity that we had to study the effects of PCBs on humans. The workers at Krummrich, some of them were exposed to PCBs, polychlorinated biphenyls, that's why this Table is in here, because especially in the early 70's, I think it was, polychlorinated biphenyls were present at the Krummrich in the exposed group, and therefore, this Table is put in for that reason. It is not because of the reasons Mr. Carr gave." (p. 41)
