Mr. Carl W. Sickles, General President
International Association of Heat & Frost
Insulators and Asbestos Workers
505 Machinists' Building
1300 Connecticut Avenue, N.W.
Washington, D.C., 20036

Dear Mr. Sickles:

For your records (The Asbestos Worker), the following were at the head table on October 20, 1964 at the dinner at the New York Academy of Sciences in association with the Conference on the Biological Effects of Asbestos.

Dr. John Higginson, Professor of Pathology, University of Kansas and Chairman, Geographical Pathology Section, International Union Against Cancer

Dr. Raimo Kiviluoto, Finland

Dr. Heinz Bohlig, Ludenscheid, Germany

Dr. Harry Heimann, Chief, Division of Occupational Health, U.S. Public Health Service

Dr. Enrico C. Vigliana, Director, Institute of Industrial Health, University of Milan, Italy

Dr. Harold Stewart, Chief, Laboratory of Pathology, National Cancer Institute

Dr. Richard Gaze, Director, Cape Asbestos Company, London.

Dr. John C. Gilson, Director, Pneumoconiosis Research Unit, Medical Research Council, Great Britain

Dr. Irving J. Selikoff, Chairman, Conference on Biological Effects of Asbestos, and Head, Section on Environmental Health, The Mt. Sinai Hospital, New York

Dr. E. Cuyler Hammond, Director, Statistical Research Division, American Cancer Society

After I opened the meeting, Dr. Stewart served as Chairman and the audience of over 100 famous scientists from all over the world were addressed by yourself, Dr. Heimann, Dr. Higginson, Dr. Gaze and Dr. Gilson.

With best regards.

Sincerely yours,

Irving J. Selikoff, M.D.

[Additional information in connection with this meeting will be published in a future Journal issue.]

Editor's Note: Your President in addressing this gathering expressed the appreciation of this International Association for the interest now being shown by these noted scientists in their study of "Asbestosis" and assured them that their efforts in this connection with this issue had insured this subject matter no longer being pushed under the rug but is now being brought out in the open where it can and will be thoroughly explored and the findings will be made available to all.
