Dr. Kehoe
Kettering Laboratory
University of Cincinnati
Cincinnati, Ohio

Dear Doctor Kehoe:

Doctor Sunderman advised me to write to you concerning a question of the normal lead concentration in kidney. If possible could you give me the range of concentration of lead in normal kidney, and the range of concentration of lead in a kidney of a person with lead poisoning.

Doctor Sunderman says that there is a very little work done on this problem, and I have been unable to find much good material in the literature. Possibly you may have a reference or two on the subject.

Sincerely yours,

A. H. Wells, M.D.
