Dr. Robert A. Kehoe
Kettering Laboratory of Applied Physiology
Eden Avenue
University of Cincinnati
College of Medicine
Cincinnati, Ohio

Dear Doctor Kehoe:

I am sending under separate cover a sample of blood and a sample of a 24 hour collection of urine for lead analyses obtained in accordance with your directions from one of our ward patients, [REDACTED]

This man's chief complaint is weakness and the union to which he belongs is anxious that he be studied for possible lead poisoning. After the routine clinical studies are completed I plan to give this patient thirty grains of ammonium chloride a day; to follow him weekly through the out-patient department; and to have him enter the ward in another month for ^{another} collection of blood and a 24 hour urine sample for lead analysis. I would deeply appreciate if you would undertake these analyses for us. The containers which you sent us are now exhausted. We do have one of your needles in our possession but we will need other containers. As I have indicated, a specimen of blood and urine from this patient will be sent to you in another month.

I have requested the interne to abstract this patient's history which I shall enclose. Also enclosed is my check for ten dollars.

With appreciation for your help and with kindest regards, I am

Sincerely yours,

*Check 10.00
