Mr. C. R. Severson - ADO - Atlanta

Ralph Bridges

With further reference to the above grower, the information that I have is basically an agreement with Dick Loomis' report, but here is a little more detail.

The samples were mailed on August 31. They arrived in St. Louis on Delta Airlines Flight #690 on September 1 which was on a Wednesday. However, they did not get down to the office until Wednesday afternoon, September 1. The analysis was started Thursday morning, September 2. They were reported to me at my home on Friday evening, September 3 at about 5:30 p.m. I called the results to Dick Loomis' home within approximately a half hour.

As you will remember, this was Labor Day weekend. The USDA offices were closed by the time we got the analyses and did not open until Tuesday morning, September 7. The results were called to USDA Tuesday morning, September 7.
