Professor Jacob Cholak
Kettering Laboratory
University of Cincinnati
Cincinnati, Ohio

Dear Prof. Cholak:

As you can see, I am now connected with the University of Washington where I am entrusted with the job of developing a teaching and research program in air resources engineering. We are building up our reference library, and I am writing to request a copy of a report produced by your group. Specifically I am referring to the report on the Donora Episode. I have a graduate student who is studying the Donora disaster. In an article by William F. Ashe entitled "Acute Effects of Air Pollution in Donora, Pa.", he mentions that one of the principal sources of information on this episode is the report published by the Kettering Laboratory of Applied Physiology.

I shall greatly appreciate receiving a copy of this report for our files. Hope to see you at APCA in Detroit.

Sincerely,

August T. Rossano, Jr.
Research Professor
