Good afternoon.

THE JURY: Good afternoon.

THE COURT: Mr. Williams, you may begin with your examination, sir.

MR. WILLIAMS: Thank you. Good afternoon.

THE JURY: Good afternoon.

DIRECT EXAMINATION (CONTINUED)

BY MR. WILLIAMS:

Q Dr. Wong, as we established before we broke for lunch, you are an expert in epidemiology.

Could you just start out by telling the jury what epidemiology is?

A Epidemiology is the branch of medical science that deals with the distribution and determinants of diseases in humans; and in that definition, you notice that there are two components. The first component is distribution.

In other words, we want to find out what kind of disease rates we see in different groups of people; and once we have identified a high risk group, we want to find out what causes that high rate of
