

October 21, 1975

Dr. James R. Allen
Department of Pathology
University of Wisconsin Medical School
Madison, Wisconsin 53706

Dear Dr. Allen:

We have reviewed the available manufacturing records and find that there is no way that we could accurately determine the manufacturing lot numbers for the AROCLOR 1248 and AROCLOR 1262 samples that you have. Our records show that the last lots of these materials were manufactured in mid-1970. We have no mechanism to determine which lots may have reached Findley Adhesives.

The samples which we obtained from you during our visit to your laboratory will be analyzed for their chlorinated dibenzofuran content.

Let me again thank you for your cooperation. We shall look forward to working with you in the future.

Sincerely,

Paul L. Wright, PhD
Mgr., Toxicology
