SUBJ: ALUMINA XSC (DISPAL 125 ALUMINA SOL) TOXICITY TESTING

VISTA

Below are the results of the subject test. The test results do indicate the potential for slight to moderate eye and skin irritation with contact. The oral and dermal routes of exposure showed no significant toxicity.

Based on these results, the MSDS and warning labels for containers will be specifically modified.

Further testing needs for the Alumina Sols will be reviewed on Ponca City on December 16.

Primary eye irritation:	washed	13.8 (0-110 scale)
	unwashed	15.7 (0-110 scale)
Primary skin irritation		2.2 (0-8.0 scale)
Oral LD ₅₀		Greater than 5050 mg/ky
Dermal LD ₅₀		Greater than 2020 mg/ky

SUBJ: TEAM MEETING

TGG: JEL? MMG AJR RF
XF: None

VISTA

A meeting is scheduled for Monday, January 16th, 1:00-4:00 p.m., Conference Room 2A in Houston. (Sorry for the Monday stuff but it was then or never.) The basic agenda for the meeting will be to address the action items in the November 23rd memo. Specifically we will begin to scope and define the next steps for existing products and review implementation training.

We are committed to complete implementation training by March 1st. Bill McClain and I will develop the content. However, as discussed, we will need your assistance in scheduling and presenting (moral support at least) the training. Please come to the meeting with some definitive plans for scheduling of the training for your respective groups.
