COMPANY CONFIDENTIAL

Attached is a detailed write-up on Plasticizers Division opportunities in capacitor fluids. Specifically, we need to agree pretty quickly whether we will sample Aerovox with Santicizer 261 and answer their question on pricing. I know Aerovox personnel very well and can assist in introducing Division personnel. Since there are several developments in the capacitor industry of potential interest to our Division, I decided to write a comprehensive report rather than address them on a piecemeal basis.

Thank you.

C. Paton
