Thanks 5.1.2e, a few additions included but not a very useful discussion.

Best regards

Hi 5.1.2e,

Would you like to talk to these guys? They are distributors of various cookware brands and have included both PFAS and ceramics in their response, but reading the accompanying text they 5.1.1c For me it's marginal whether to talk to them, but they would be the only distributor in this area. We have already spoken to FEC. What do you think?

Best regards

Hi 5.1.2e,

No problem at all. The focus of this work is the EU (and EEA). So please complete the questionnaire primarily for the EU business in terms of tonnages, percentages etc. But, we are also really interested to know about exporters to the EU that are based in Asia or the US, so it would also be greatly appreciated if you could separately record their data e.g. tonnages exported, for what use, feasibility of alternatives and any problems they foresee with the forthcoming restriction.

Best regards

Good Morning 5.1.2e

Sorry for all the questions.

I was looking at questions 9 and 11. Should we focus on our European business when answering these questions or Global business?

It looks like it is going to be difficult for us to get quantitative answers, but I will try to get business percentages.

Could I provide the Questionnaire to other companies and entities that have not submitted any comment on the first round?

Will you accept their responses?

What if they are in Asia or other continents?

I will probably have something the week after thanksgiving so that we can discuss it.

Thanks,

5.1.2e

Hi 5.1.2e,

Quick question. On each table the "Non-stick coatings utensils and cookware" row is listed twice. Just wanted to see if you meant to write something else instead?

Function	Application and alternative to PFAS used
Non-stick coatings utensils and cookware	
Greaseproof paper, muffin cases, etc.	
Baking trays, sheets and food conveyor belts	
Non-stick coatings utensils and cookware	
Other applications (add further lines if necessary)	

Thanks,

5.1.2e

CAUTION: This Email is from an EXTERNAL source. Ensure you trust this email address before replying or clicking on any links or attachments.

Dear 5.1.2e and 5.1.2e,

Thank you for reaching out. I wanted to clarify something. The email body has a November 27th deadline but the Kitchenware Questionnaire has a November 13th deadline. There is no way I can respond by tomorrow but I am going to try my best to meet the latter.

Regards,

To: 5.1.2e < 5.1.2e @exponent.com>, 5.1.2e < 5.1.2e @emrc.co.uk>

Dear Stakeholder,

Thank you very much for providing information to the call for evidence on a proposed restriction of PFAS that closed in July. Exponent has been appointed as a consultant by the Dutch Institute for Public Health and the Environment (RIVM) to lead a project to investigate the marketplace for PFAS, fluoropolymers and their alternatives that are used in the food sector and also in packaging. An introductory letter is attached.

Please find attached three short questionnaires which are aimed at collecting market information. This is in addition to the information you have already provided in the call for evidence which we have. This market information may be very important in determining the direction and scope of the future restriction proposal. The questionnaires are: 1) food packaging and non-food packaging; 2) Kitchenware; and 3) food and feed processing equipment.

Due to circumstances beyond our control, we have a compressed timeframe to collect information. We would therefore be grateful if you could complete the questionnaire(s) most relevant to your business to the extent possible and return to myself and 5.1.2e **by Friday 27 November at the latest**. If you foresee this deadline being problematic and need further time, please can you indicate this to us at your earliest convenience.

We may wish to follow up your response to the questionnaire with a telephone discussion. Please can you indicate if there are

dates before the end of November that are not possible for such a discussion.

Please label any confidential data you provide to us. We have the necessary agreements in place both with our client, RIVM and with our Associate, [REDACTED] 5.1.2e to ensure commercially sensitive information is protected and not placed in the public domain. With 30 offices and over a 1,000 staff worldwide, Exponent is a leading scientific and regulatory consulting firm, having provided services to the chemical industry and the users of their products for more than 50 years. With offices and experts in the UK, EU, US, and Asia, we offer a wide range of technical and regulatory expertise to help companies of all sizes meet their chemical regulatory obligations worldwide. For further information please visit [our website here](#).

Thank you very much in advance for your collaboration.

Best regards
