Subject: RE: PFHxA Restriction

Bonjour ■■■■,

After the discussions of the last REACH Cee I am quite certain that the COM will not revert from the targeted approach that they have proposed for this restriction. They have made clear that this is non-negotiable, with the compromise that they will be including a reference to the other ongoing PFAS restriction initiatives in the recitals. Therefore I am quite certain that the final proposal by the Commission will only have some minor amendments to the current text. As this targeted approach is very limited, and not in line with the CSS goals on PFAS, we think that this is a worrying precedent for the other PFAS restrictions. This approach could result in COM deciding to also go for a targeted scope for the other PFAS restrictions, which could severely delay the complete phase-out of PFAS. Because of these reasons we are proposing not to support the current proposal.

You can find a more detailed justification in the BCR memo:

To: [REDACTED] (SPF Santé Publique - FOD Volksgezondheid) <[REDACTED].[REDACTED]@health.fgov.be>

Subject: PFHxA Restriction

Hello,

What are the latest developments in the PFHxA dossier, if any?

Our Cabinet would know if something could come at the agenda during the Presidency.

Thank you to help me keep them up to date.

Best regards,

[REDACTED]
