Re: Request #17984 and 18016

Dear Mr. Clampitt:

As you requested, I am enclosing some data sheets and prices on our amorphous polypropylene. I have included information on Oletac 100 and 101 which are polypropylene homopolymer derivatives and Oletac 200A and 200B which are copolymer derivatives.

I have also made arrangements to supply you with a 5 pound sample of each of these Oletac grades.

Thank you for your interest in Avisun products and if I can provide any additional information, please let me know.

Very truly yours,

AVISUN CORPORATION
