Dear Bob:

We are pleased to send you our check in the amount of \$101.27 as part payment for your recent trip here and as detailed in your expense account dated May 3.

All of us certainly appreciated your taking the time to come down on such short notice and to give us one of your excellent summary reports.

Very truly yours,

Don G. Fowler
Project Manager

Dear Bob:

If you will recall, in my paper in Detroit I mentioned the desirability of some simple office test for lead determinations, and that evening you told me that you or your associates had devised a simple test which would serve to determine whether there was an increased lead absorption. From your remarks I took it that this was a screening test but not a quantitative test.

If the description of this test has been published, will you let me know where, or if not, is it possible that I could have the details of the test? The test you mentioned would be of great benefit in this office, since I see many cases of alleged lead intoxication but which from the history and the clinical examination are obviously not. Yet at the present time I must go on with actual blood and urine determinations to arrive at a conclusive opinion.

Thanking you, and with best personal regards,

Sincerely,

R. T. JOHNSTONE, M.D.
