Questions on the Asbestos Problems

1. How much is being used? Total in stock - Total on reorder
2. Type used (ex: paper, cloth, granular, sheets, etc.). Also various products using a % of asbestos - coated, etc. - trade names.
3. How is it used? Procedures involved from receipt to finished product.
4. Total personnel in direct contact (using product).
5. Amount of people in adjacent areas subject to contact (air borne, poor house-keeping, not properly restricted from area or contact).
6. Describe operations involved - machinery, equipment, hand use necessary for proper application.
7. List of all sections, areas and job cards using asbestos.
8. What areas and operations were tested (as required by law)?
9. What other areas and operations will you test?
10. What are the results of these tests? What type were they? Who took them?
Note: We request copies of all tests taken. We request presence at all future tests and copies of the results. Will this be granted?
11. List of all who were notified of physicals - amount completed. Those who refused request and reasons. Will this be granted?
12. Will these physicals be given again? How often?
13. What other people (name operations) will be given these physicals?
14. Do you intend to test people close to the area of operation?
15. Do you intend to test people that have previously held these jobs?
Note: We request a list of all people that have previously held these jobs. Will you comply?
16. Will results of physicals be given to employees or representative by request? Will they be given to their physician? Will they be given to the union?
17. What areas or operations have you had or have problems? What has been done to correct these? What will be done for the balance?
