COMPANY
LOCATION TEXAS CITY PLANT

DATE March 11, 1980

FROM TO Terrence Lemmond

SUBJECT Terrence Lemmond

Per your request to review the restrictions on this employee in view of permitting him to attend safety meetings at Building 191, I am of the opinion that this would not cause any increased hazard of exposure to ethylene amines. The distance from the amines unit is actually farther than from other permitted areas. The question has been reviewed with Perihan Yalcinkaya and Jack Erdman and they concur in this recommendation.

OSHA COMPLIANCE OFFICER, RICHARD MILLER, WAS IN TEXAS CITY PLANT ON 10-16-79 ON A PREARRANGED MONITORING OF THE PERSONNEL DURING THE ETHYLENE OXIDE FILTER CHANGE OPERATION. MR. MILLER INDICATED THAT THIS VISIT WILL PROBABLY CONCLUDE OSHA'S INVOLVEMENT WITH THE BRAIN TUMOR INVESTIGATION.
