

1 don't need to belabor the point.

2 If you remember, Mr. Williams talked about
3 Dr. Wong and the 10 to 20 per million rate in 1987
4 study. That was for the general population, that
5 wasn't for a background rate.

6 Now, the last thing I want to focus on, just
7 listen to this: Mr. Williams says that asbestos-
8 containing products in place that are never cut, that
9 are never handled caused or may have caused Mr.
10 Grewe's mesothelioma.

11 Never touched them, never cut them, they
12 were in place, but they caused it, but exposure to
13 brake dust that he is blowing out into his face, that
14 he is grinding, that he exposes himself to those types
15 of products, they don't cause the disease.

16 That is just completely inconsistent.

17 Products in place do; products, the exposure
18 to which require cutting, grinding, sanding, blowout,
19 don't.

20 If you will remember, search your
21 recollection. Ford admitted conclusively that Mr.
